

## Simple Queries in SQL

### Chapter - 14

#### Type A: Very Short Answer Questions

<b>1</b>	<b>Maximum how many characters can be stored in a (i) text literal (ii) numeric literal?</b>		
<b>Ans.</b>	In MySQL 5.1 text literal can store maximum of 4000 bytes and in numeric literal maximum of 53 digits of precision can store. But in newer version of MySQL this figure is increased.		
<b>2</b>	<b>What is a datatype? Name some datatype available in MySQL.</b>		
<b>Ans.</b>	Datatypes are means to identify the type of data and associated operations for handling. A value's datatype associated a fixed set of properties with the value. In MySQL there various datatypes for example – int, decimal, char, varchar, date etc.		
<b>3</b>	<b>What are fixed length fields? What are variable length fields?</b>		
<b>Ans.</b>	<b>Fixed length fields</b> – fields whose length (maximum number of data) is fixed and occupy the maximum number of length even if maximum number of data is not filled in field. <b>Variable length fields</b> – here every data element in the field is determined separately and the number of characters in data element becomes its field length. It does not occupy the maximum number of length if number of data is less than the maximum length.		
<b>4</b>	<b>Compare Char and Varchar datatypes?</b>		
<b>Ans.</b>	<b>CHAR</b>	<b>VARCHAR</b>	
	Fixed length datatype	Variable length datatype	
	If a value is shorter than the length then blanks are added, but the size of value remains same.	If the values is shorter than the length then no blanks are added and values stored exactly of its length.	
<b>5</b>	<b>What is null value in MySQL database? Can you use nulls in arithmetic expressions?</b>		
<b>Ans.</b>	If a column in a row has no value, then column is said to be null, or contain a null. Yes we can use null in arithmetic expression but it should be avoid from use.		
<b>6</b>	<b>Which keyword eliminates the redundant data from a query result?</b>		
<b>Ans.</b>	DISTINCT keyword		
<b>7</b>	<b>Which keyword retains duplicate output rows in a query result?</b>		
<b>Ans.</b>	ALL keyword		
<b>8</b>	<b>How would you display system date as the result of a query?</b>		
<b>Ans.</b>	SELECT CURDATE( );		
<b>9</b>	<b>How would you calculate 13 * 15 in SQL?</b>		
<b>Ans.</b>	SELECT 13 * 15;		
<b>10</b>	<b>Which function is used to substitute NULL values in a query result?</b>		
<b>Ans.</b>	IFNULL() function is used to substitute NULL value, for eg. SELECT FnameIFNULL(Lname,"not mentioned"), birth from student; This query will substitute all NULL rows of column Lname by string "not mentioned".		
<b>11</b>	<b>Which operator concatenates two strings in a query result?</b>		
<b>Ans.</b>	By using " " we can concatenate two string for eg. SELECT "Fname Lname";		
<b>12</b>	<b>Which comparison operator is used for comparing (i) patterns (ii) character values (iii) null values (iv) ranges (v) list of values</b>		
<b>Ans.</b>	(i) patterns – %, _ (ii) character values – LIKE, = (iii) null values – IS NULL (iv) ranges – <, <=, >, >=, BETWEEN (v) list if values – IN , NOT IN		

#### Type B: Short Answer Questions

Consider table **Empl** given in solved problem and answer the following questions

1	Write a query to display ename and sal of employees whose salary is greater than or equal to 2200 from table empl?																																																								
Ans.	SELECT ename, sal FROM empl WHERE sal >= 2200;																																																								
2	Write a query to display details of employees who are not getting commission from table empl?																																																								
Ans.	SELECT * FROM empl WHERE comm IS NULL;																																																								
3	Write a query to display employee name and salary of those employee who don't have their salary in the range of 2500 to 4000?																																																								
Ans.	SELECT ename, sal FROM empl WHERE sal NOT BETWEEN 2500 AND 4000; OR SELECT ename, sal FROM empl WHERE sal <2500 OR sal >4000;																																																								
4	Write a query to display the name, job title and salary of employees who do not have manager?																																																								
Ans.	SELECT ename, job, sal FROM empl WHERE mgr IS NULL;																																																								
5	Write a query to display the name of employees whose name contains 'A' as third alphabet?																																																								
Ans.	SELECT ename FROM empl WHERE ename LIKE '__A%';																																																								
6	Write a query to display the name of employees whose name contains 'T' as last alphabet?																																																								
Ans.	SELECT ename FROM empl WHERE ename LIKE '%T';																																																								
7	Write a query to display the name of employees whose name contains 'M' as first alphabet 'L' as third alphabet?																																																								
Ans.	SELECT ename FROM empl WHERE ename LIKE 'M_L%';																																																								
8	Write a query on the customers table whose output will exclude all customers with a rating <=100, unless they are located in Shimla.																																																								
Ans.	Table not given in book. Assuming that table have column rating and city query will be – SELECT cust_name FROM customers WHERE rating >=100 OR city LIKE 'Shimla'																																																								
9	Write a query that selects all orders (order table) except those with zeros or NULLs in the amt field.																																																								
Ans.	Table not given in book. Assuming that table have column rating and city query will be – SELECT * FROM order WHERE amt IS NOT NULL;																																																								
10	Write SQL commands for the following on the basis of given table SPORTS <b>TABLE- SPORTS</b> <table><tr><th>St_No</th><th>Class</th><th>Score</th><th>Name</th><th>Game1</th><th>Grade 1</th><th>SUPW</th><th>Grade 2</th></tr><tr><td>10</td><td>7</td><td>8</td><td>Sammer</td><td>Cricket</td><td>B</td><td>Photography</td><td>A</td></tr><tr><td>11</td><td>8</td><td>3</td><td>Sujit</td><td>Tennis</td><td>A</td><td>Gardening</td><td>C</td></tr><tr><td>12</td><td>7</td><td>3</td><td>Kamal</td><td>Swimming</td><td>B</td><td>Photography</td><td>B</td></tr><tr><td>13</td><td>7</td><td>7</td><td>Venna</td><td>Tennis</td><td>C</td><td>Cooking</td><td>A</td></tr><tr><td>14</td><td>9</td><td>8</td><td>Archana</td><td>Basketball</td><td>A</td><td>Literature</td><td>A</td></tr><tr><td>15</td><td>10</td><td>3</td><td>Arpitt</td><td>Cricket</td><td>A</td><td>Gardening</td><td>C</td></tr></table> <p>(i) Display the names of the students who are getting a grade 'C' in either GAME or SUPW. (ii) Display the different games offered in the school. (iii) Display the SUPW taken up by the students, whose name start with 'A'.</p>	St_No	Class	Score	Name	Game1	Grade 1	SUPW	Grade 2	10	7	8	Sammer	Cricket	B	Photography	A	11	8	3	Sujit	Tennis	A	Gardening	C	12	7	3	Kamal	Swimming	B	Photography	B	13	7	7	Venna	Tennis	C	Cooking	A	14	9	8	Archana	Basketball	A	Literature	A	15	10	3	Arpitt	Cricket	A	Gardening	C
St_No	Class	Score	Name	Game1	Grade 1	SUPW	Grade 2																																																		
10	7	8	Sammer	Cricket	B	Photography	A																																																		
11	8	3	Sujit	Tennis	A	Gardening	C																																																		
12	7	3	Kamal	Swimming	B	Photography	B																																																		
13	7	7	Venna	Tennis	C	Cooking	A																																																		
14	9	8	Archana	Basketball	A	Literature	A																																																		
15	10	3	Arpitt	Cricket	A	Gardening	C																																																		
Ans.	(i) SELECT name FROM sports WHERE grade1='C' OR grade2='C'; (ii) SELECT DISTINCT game1 FROM sports; (iii) SELECT SUPW FROM `sports` WHERE name LIKE 'A%';																																																								
11	Write SQL commands for the following on the basis of given table SPORTS <b>TABLE- SPORTS</b> <table><tr><th>St No</th><th>Class</th><th>Score</th><th>Name</th><th>Game1</th><th>Grade 1</th><th>Game2</th><th>Grade 2</th></tr><tr><td>10</td><td>7</td><td>8</td><td>Sammer</td><td>Cricket</td><td>B</td><td>Swimming</td><td>A</td></tr><tr><td>11</td><td>8</td><td>3</td><td>Sujit</td><td>Tennis</td><td>A</td><td>Skating</td><td>C</td></tr><tr><td>12</td><td>7</td><td>3</td><td>Kamal</td><td>Swimming</td><td>B</td><td>Football</td><td>B</td></tr><tr><td>13</td><td>7</td><td>7</td><td>Venna</td><td>Tennis</td><td>C</td><td>Tennis</td><td>A</td></tr><tr><td>14</td><td>9</td><td>8</td><td>Archana</td><td>Basketball</td><td>A</td><td>Cricket</td><td>A</td></tr><tr><td>15</td><td>10</td><td>3</td><td>Arpitt</td><td>Cricket</td><td>A</td><td>Athletics</td><td>C</td></tr></table> <p>(i) Display names of the students who have grade 'C' in either Game1 or Game2 or both.</p>	St No	Class	Score	Name	Game1	Grade 1	Game2	Grade 2	10	7	8	Sammer	Cricket	B	Swimming	A	11	8	3	Sujit	Tennis	A	Skating	C	12	7	3	Kamal	Swimming	B	Football	B	13	7	7	Venna	Tennis	C	Tennis	A	14	9	8	Archana	Basketball	A	Cricket	A	15	10	3	Arpitt	Cricket	A	Athletics	C
St No	Class	Score	Name	Game1	Grade 1	Game2	Grade 2																																																		
10	7	8	Sammer	Cricket	B	Swimming	A																																																		
11	8	3	Sujit	Tennis	A	Skating	C																																																		
12	7	3	Kamal	Swimming	B	Football	B																																																		
13	7	7	Venna	Tennis	C	Tennis	A																																																		
14	9	8	Archana	Basketball	A	Cricket	A																																																		
15	10	3	Arpitt	Cricket	A	Athletics	C																																																		

	(ii) Display names of the students who have same game for both Game1 and Game2. (iii) Display the games taken up by the students whose name starts with 'A'.																																																																													
Ans.	(i) SELECT name FROM sports WHERE grade1='C' OR grade2='C'; (ii) SELECT name FROM sports WHERE game1 = game2; (iii) SELECT gmes1,game2 FROM sports WHERE name LIKE 'A%';																																																																													
12	<p>Write SQL commands for the following on the basis of given table CLUB:</p> <p style="text-align: center;"><b>Table: CLUB</b></p> <table><tr><th>COACH_ID</th><th>COACH_NAME</th><th>AGE</th><th>SPORTS</th><th>DATOFAPP</th><th>PAY</th><th>SEX</th></tr><tr><td>1.</td><td>KUKREJA</td><td>35</td><td>KARATE</td><td>27/03/1996</td><td>1000</td><td>M</td></tr><tr><td>2.</td><td>RAVINA</td><td>34</td><td>KARATE</td><td>20/01/1998</td><td>1200</td><td>F</td></tr><tr><td>3.</td><td>KARAN</td><td>34</td><td>SQUASH</td><td>19/02/1998</td><td>2000</td><td>M</td></tr><tr><td>4.</td><td>TARUN</td><td>33</td><td>BASKETBALL</td><td>01/01/1998</td><td>1500</td><td>M</td></tr><tr><td>5.</td><td>ZUBIN</td><td>36</td><td>SWIMMING</td><td>12/01/1998</td><td>750</td><td>M</td></tr><tr><td>6.</td><td>KETAKI</td><td>36</td><td>SWIMMING</td><td>24/02/1998</td><td>800</td><td>F</td></tr><tr><td>7.</td><td>ANKITA</td><td>39</td><td>SQUASH</td><td>20/02/1998</td><td>2200</td><td>F</td></tr><tr><td>8.</td><td>ZAREEN</td><td>37</td><td>KARATE</td><td>22/02/1998</td><td>1100</td><td>F</td></tr><tr><td>9.</td><td>KUSH</td><td>41</td><td>SWIMMING</td><td>13/01/1998</td><td>900</td><td>M</td></tr><tr><td>10.</td><td>SHAILYA</td><td>37</td><td>BASKETBALL</td><td>19/02/1998</td><td>1700</td><td>M</td></tr></table> <p>(a) To show all information about the swimming coaches in the club.
