Introduction

Outlook '2003 is a powerful Information management application that allows you to co-ordinate projects using a variety of different tools. These range from E-mail for communication, to the Calendar, which can be used for time management.

All graphics related to Microsoft in this book is in compliance with Microsoft guidelines and thus permitted by Microsoft.

How to use this guide

This manual should be used as a point of reference following attendance of the Outlook '2003 training course. It covers all the topics taught and aims to act as a support aid for any tasks carried out by the user after the course.

The manual is divided into sections, each section covering an aspect of the course. The table of contents lists the page numbers of each section and the table of figures indicates the pages containing tables and diagrams.

Objectives

Sections begin with a list of objectives each with its own check box so that you can mark off those topics that you are familiar with following the training.

Instructions

Those who have already used a similar application before may not need to read explanations on what each command does, but would rather skip straight to the instructions to find out how to do it. Look out for the hand icon Fwhich precedes a list of instructions.

Keyboard

Keys are referred to throughout the manual in the following way:

[ENTER] – denotes the return or enter key, [DELETE] – denotes the Delete key and so on.

Where a command requires two keys to be pressed, the manual displays this as follows:

[CTRL][P] – this means press the letter "p" while holding down the Control key.

Commands

When a command is referred to in the manual, the following distinctions have been made:

When menu commands are referred to, the manual will refer you to the menu bar – "Choose File from the menu bar and then Print".

When dialog box options are referred to, the following style has been used for the text – “In the **Page Range section of the Print dialog, click the **Current Page** option”**

Notes

Within each section, any items that need further explanation or extra attention devoted to them are denoted by shading.
For example:

“Outlook will not let you close a mail message that you haven’t already saved without prompting you to save.”

1 Understanding Outlook 2003

Objectives:

By the end of this section you will be able to:

- **Understand the uses of Microsoft Outlook**
- **Get started**
- **Recognise Outlook screen elements**
- **Access Help**

1.1 What is Microsoft Outlook 2003?

Outlook '2003 is an information management application that helps the user to co-ordinate messages, calendar activities, contacts and tasks. It comprises a mailbox, a calendar, a contact list, notes and a journal. Outlook is designed for both stand-alone computers and personal computer networks. If the user is connected to a network they can share their information with others.

Outlook comes with a transport application known as Exchange. A transport application enables the flow of information and must be installed to use Outlook's e-mail feature. E-mail is sent in and out of mailboxes in the same way as physical mail goes through a postal service. Mailboxes can be set up for individual users or for multiple users. All networked users with mail accounts can share information by using Outlook and a transport application such as Exchange.

1.2 Getting started with Outlook 2003

When Outlook 2003 is installed, the Setup program looks for the user's *user profile*. A user profile is a group of settings that define the setup of Outlook for a particular user. Only one user profile is needed to access Outlook, however, multiple user profiles can be set up each with their own unique settings, e.g. if there is more than one person using Outlook, each user should have their own user profile set up. The user's administrator usually creates user profiles.

When setting up user profiles, certain information services can be included. An information service is a group of settings that enables the user to send, store and receive messages and items, and indicates where to store addresses, e.g. in a Personal Address Book.

When Outlook 2003 is launched, depending on the configuration, the user may be asked to enter a password.

To enter a password:

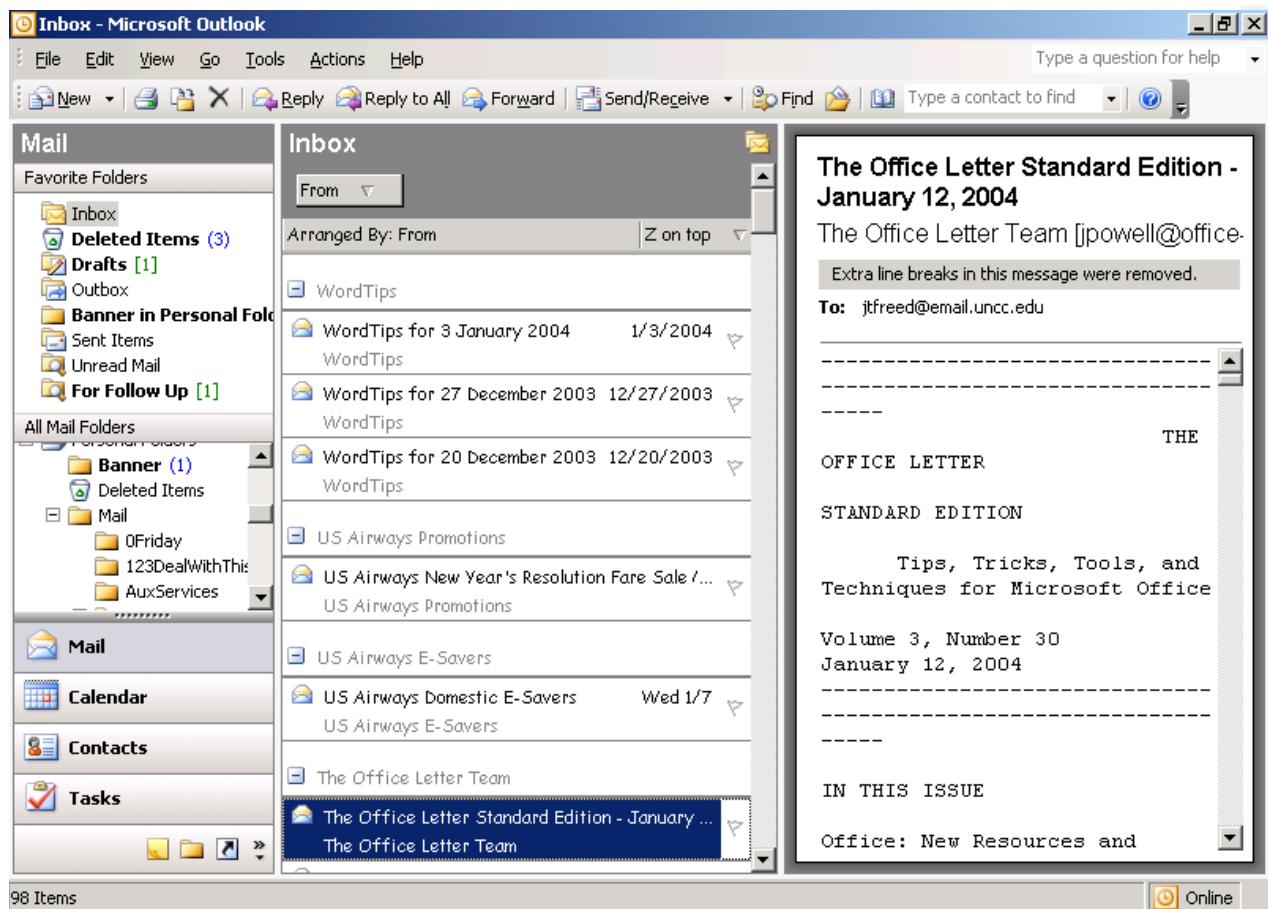

Keyboard

- Type the relevant password
- Press [ENTER]

When Outlook is started, the Office Assistant displays a dialog box welcoming the user and offering help on certain topics

1.3 The Outlook 2003 Screen

When Outlook 2003 is first started, the user is presented with the following screen:

Title bar

The Title Bar appears at the top of the Outlook window, registering the title of the application and the selected Outlook folder. If the Outlook window is not maximised, by positioning the mouse over the title bar and clicking and dragging, you can move the window to a new location on the screen.

Menus

The menu bar contains menus giving access to all the commands that can be carried out in Outlook. There are two methods for accessing menus and their options - the menu bar and the shortcut menu.

Menu Bar

The menu bar displays all options available within Outlook. You can access a menu by clicking its name with the left mouse button.

 To select a menu bar menu:

Mouse

- Click on the menu title. A pull-down menu will appear listing all options available. To reveal the rest of the menu click on the arrows at the bottom of the menu.
- Click the required menu option.

Or

Keyboard

- Hold down the [ALT] key and press the underlined letter of the menu title.
- Type the underlined character of the required option.

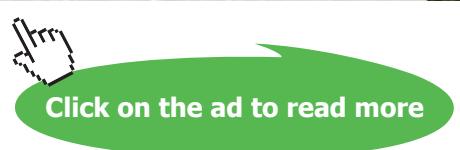

WHERE DO YOU WANT TO BE?

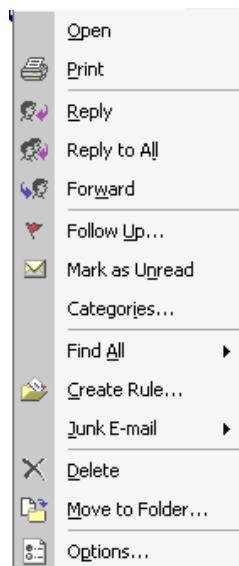

TomTom is a place for people who see solutions when faced with problems, who have the energy to drive our technology, innovation, growth along with goal achievement. We make it easy for people to make smarter decisions to keep moving towards their goals. If you share our passion - this could be the place for you.

Founded in 1991 and headquartered in Amsterdam, we have 3,600 employees worldwide and sell our products in over 35 countries.

For further information, please visit tomtom.jobs

1.4 Shortcut menus

The shortcut menus can only be accessed when the mouse is positioned over a message or another item and you click the right mouse button. The options that appear on the shortcut menus may differ depending on what you have selected.

To select a shortcut menu option:

Mouse

- Click with the right mouse button over an item. A pull-down menu will appear listing all options available.
- Click the required menu option.

Toolbars

Outlook has three different toolbars that can be displayed on the screen, the Standard toolbar, the Advanced toolbar and the Web toolbar.

The Standard toolbar contains buttons for commonly carried out operations such as creating new messages, appointments and actioning the selected items, whereas Advanced toolbar buttons are devoted to navigation, automation and customisation of Outlook. When you hover your mouse over any toolbar button, Outlook will display a description of what the button does.

Show and hide toolbars

You can call up many more toolbars while you are working with Word giving you access to buttons that relate to specific tasks.

 **To show a toolbar:**

Mouse

- Click the right mouse button anywhere over a displayed toolbar.
- From the resulting menu, click the toolbar you want to show.
- To hide a toolbar:

Mouse

- Click the right mouse button anywhere over a displayed toolbar.
- The resulting menu will show you the currently displayed toolbars with a tick symbol next to them. Click the toolbar you want to hide.

Viewing Information in Outlook

Default Outlook Folder	Description
Outlook Today	Enables the user to keep track of your appointments and tasks in one window along with keeping you informed of the e-mail you have.
Inbox	Receives your incoming messages, enabling the user to send and receive messages.
Calendar	Enables the user to schedule appointments and events.
Contacts	Enables the user to enter and keep track of business and personal contacts.
Tasks	Enables the user to create and manage tasks.
Journal	Records all items as they occur, such as accessing an office file, sending an e-mail message
Notes	Electronic "sticky notes", storing text information that enables the user to quickly record reminders.
Deleted items	Contains any items that the user deletes in Outlook before they are permanently deleted.
Sent Items	Keeps copies of messages that have been sent by the user.
Outbox	Temporarily contains message that the user sends until they are delivered.
Drafts	Stores incomplete messages enabling the user to go back to them to complete and send later on.

View Pane

To view and work with the items of information stored in a particular folder, you need to open that folder. Outlook will then display the folder's items in the View pane of the Outlook window and the Outlook menu commands and toolbar buttons will change to provide the commands you need to manage the type of information kept in that folder.

1.5 Outlook Shortcuts

One of the fastest ways to open an Outlook folder is to use Shortcuts. Users can add shortcut groups that quickly open their favourite and most frequently used folders. The user can add, remove or change the size of the shortcuts. The Shortcuts section in the Navigation pane can be divided into groups to help organise the user's information. These groups contain related shortcuts. Users can also create their own groups.

To switch to shortcuts and Groups:

Mouse

- Click the Shortcuts icon at the bottom of the navigation
- The navigation pane will display hyperlinks allowing you to set up a shortcut to a particular item, or a group heading under which you can store a collection of shortcuts.

Keyboard

- Press [CTRL] 7

Alcatel-Lucent 

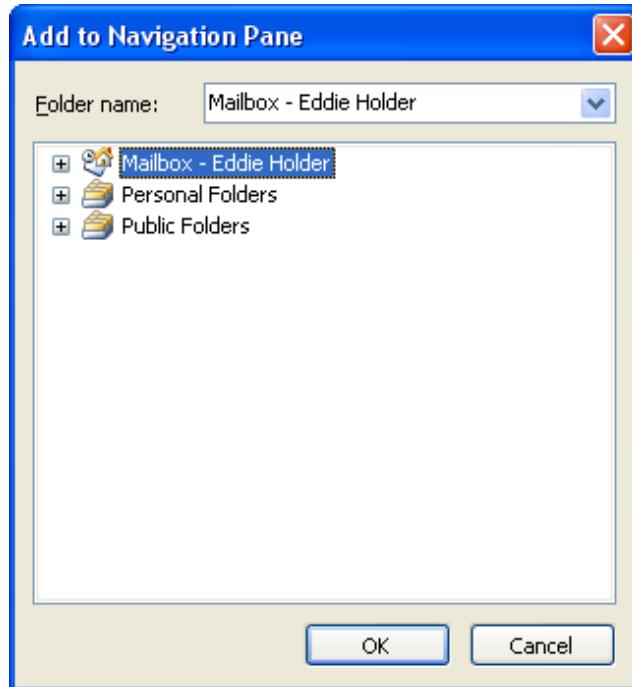

www.alcatel-lucent.com/careers

 **To set up shortcuts:**

Mouse

- Click the Add New Shortcut hyperlink from the Navigation Pane.
- Choose the item you wish to make a shortcut for from the Add to Navigation Pane dialog box.

- Click OK. The shortcut will appear under the heading "Outlook shortcuts" at the top of the Navigation Pane.

 **To set up Groups:**

Mouse

- Click the Add New Group hyperlink from the Navigation Pane.
- Type in a heading that best describes the group of shortcuts you will assign to the group – e.g. Messages and schedule.
- The Group will appear in alphabetical order in the top half of the Navigation Pane.

If the Navigation pane is not displayed, choose the View, Navigation Pane command from the menu bar.

 **To add shortcuts to groups:**

Mouse

- Right-click over the group name and choose Add New Shortcut.
- Select the required shortcut from the resulting dialog box.

Or

- If the shortcut already exists drag and drop it over the group name.

 **To remove a shortcut:**

Mouse

- Right-click over the shortcut and choose Delete shortcut from the menu

 **To remove a group:**

Mouse

- Right-click over the group name and choose Remove Group from the menu.

Removing a group will also delete all shortcuts belonging to that group

 **To move a shortcut within the same group:**

Mouse

- Click and drag the shortcut required to a new location in the Navigation Pane.
- Release the mouse.

 **To move a shortcut to a different group:**

Mouse

- Click and drag the shortcut onto the required group. The group expands to display its contents.
- Drag the shortcut to the required location within the group.
- Release the mouse.

 **To rename a group on the Outlook bar:**

Menu

- Click the right mouse button on the group to rename, choose Rename Group.
- Type a new name for the group and press [ENTER].

Previewing Items

You can view the contents of an Outlook item without having to open it in a form.

AutoPreview

AutoPreview allows you to see the first three lines of messages in the main Outlook window.

 **To use AutoPreview**

Mouse

- On the View menu, click AutoPreview or click the AutoPreview icon  on the advanced toolbar.

eddie.holder@f...							None
Year	Qtr	Catalog No	ChannelCategory	Publisher	Units	Sales	
1998	1	41210	Domestic	Drama	Penguin	30,922.00	310,755.00
1999	2	30782	Domestic	Tragedy	Mc Millan	26,151.00	371,831.00

- To hide the AutoPreview, repeat the above step.

To preview the first three lines of unread messages only, on the View menu, point to Arrange By, Current View, and then click Customize Current View. Click Other Settings, and then click Preview unread items.

1.6 Reading Pane

In the Reading pane, you can read the content of an item, open attachments, follow a hyperlink, and respond to meeting requests without having to open it in a separate form.

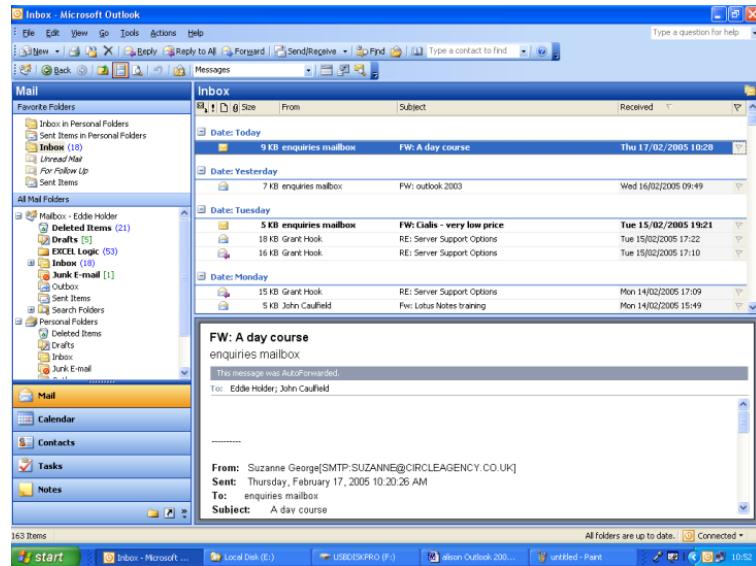

To use Reading pane

Mouse

- Click the Reading pane icon  on the advanced toolbar.

The advertisement features a close-up portrait of a woman with red hair, smiling. The background is dark and slightly blurred. A red diagonal stripe runs from the top-left corner towards the center. On the right side, there is blue text: "REDEFINE YOUR FUTURE" at the top, followed by "Join AXA, A GLOBAL LEADING COMPANY IN INSURANCE AND ASSET MANAGEMENT" in a larger, bold font. At the bottom right is the AXA logo with the tagline "redefining / standards". A small vertical credit "agence cdg - © Photononstop" is visible on the left edge of the image.

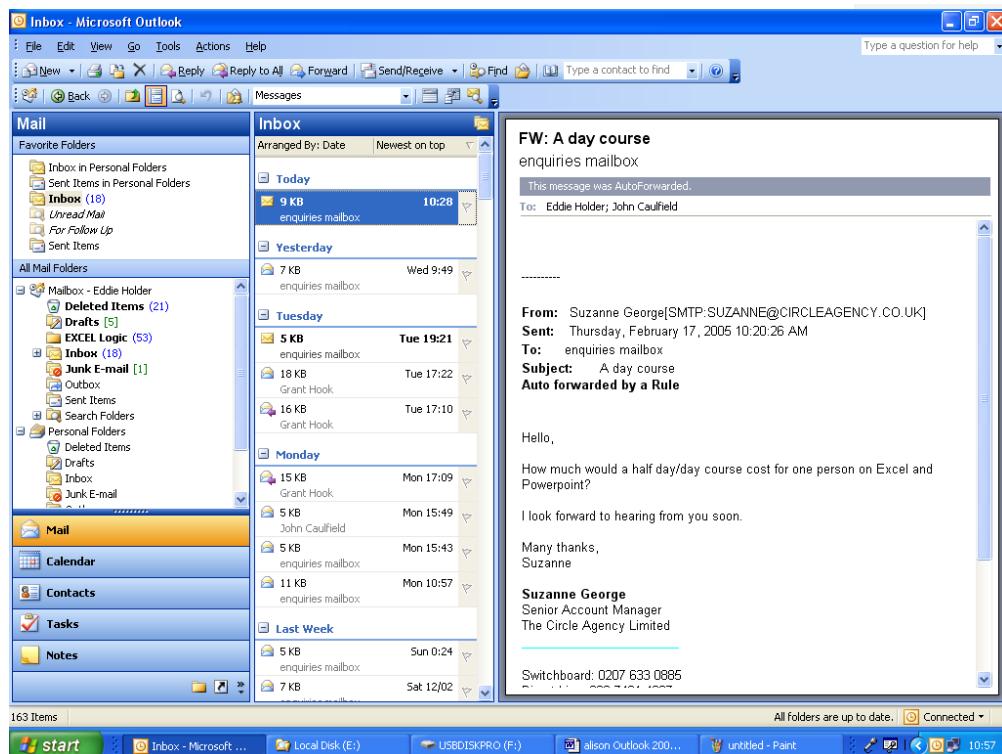

- To hide the Reading pane, repeat this step.

To position the Reading pane

Mouse

- Choose, View, Reading Pane from the menu bar.
- Choose the Right or Bottom from the sub-menu.

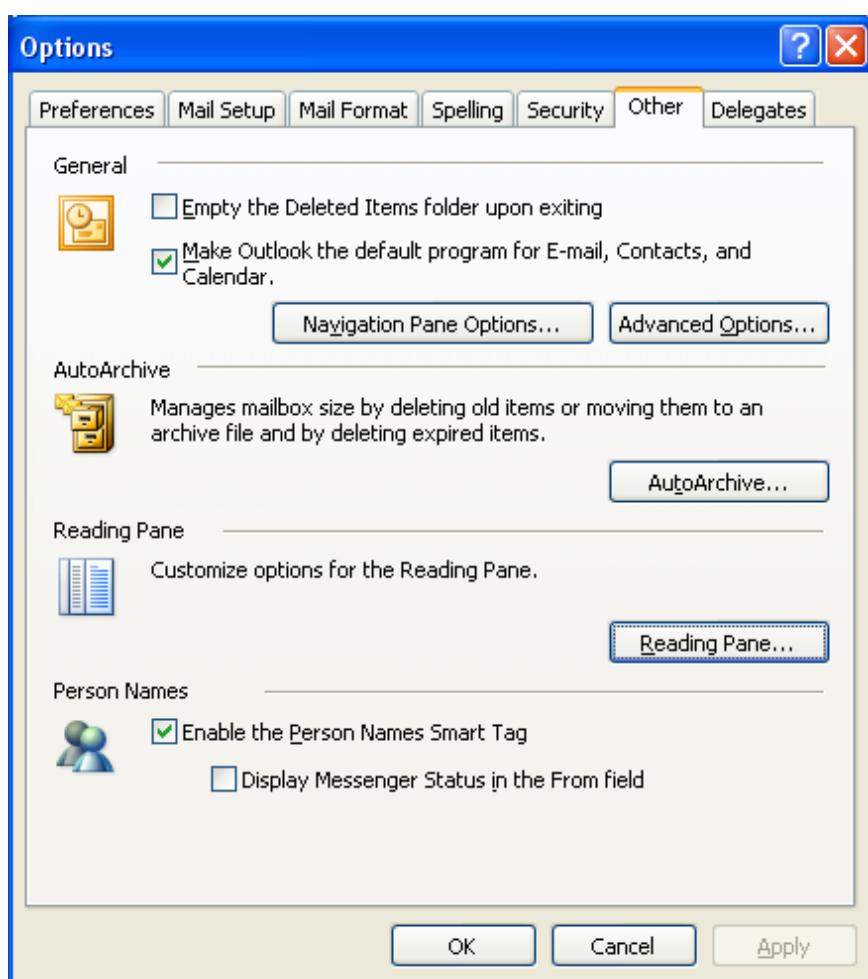

1.7 Reading pane options

You can set options to determine how messages are treated when viewed in the Reading Pane – for example, do you want them to appear as read or stay unread.

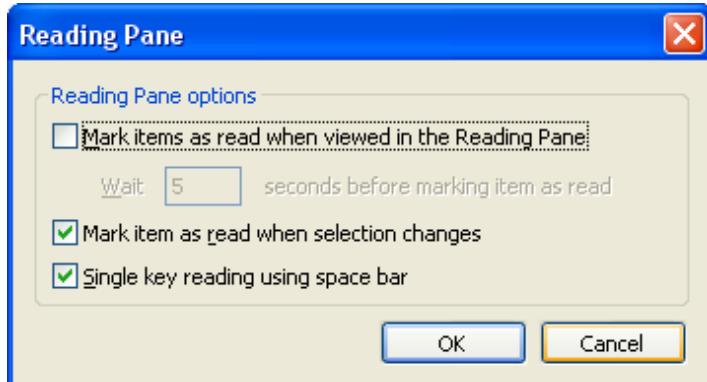

To set Reading Pane options

Mouse

- Choose Tools, Options from the menu bar.
- Click the Other tab

- Click the Reading Pane... button.

- Set the options you require and click OK.

1.8 Microsoft Outlook Help

Outlook offers several quick ways to get help when performing particular tasks. You can select from a list of topics provided by Help, or you can even type a help request in plain English, and Outlook will supply the answer using the *Answer Wizard*.

The Office Assistant

In Outlook 2003, you can use the Assistant to get help quickly by typing plain English questions or phrases.

Nido

Luxurious accommodation

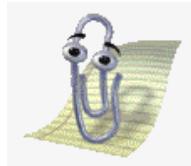

Central zone 1 & 2 locations

Meet hundreds of international students

BOOK NOW and get a £100 voucher from voucherexpress

Nido Student Living - London

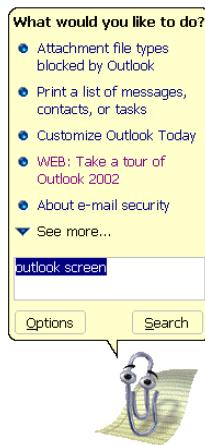

Visit www.NidoStudentLiving.com/Bookboon for more info.
+44 (0)20 3102 1060

 **To use the Assistant:**

Mouse

- Choose “Help , Show the” from the menu bar to turn the assistant on if it has not been turned on.
- When the Assistant is turned on, you can quickly display the Assistant and its balloon by choosing “Help, Microsoft Outlook Help” from the menu bar, by clicking the Help toolbar button, or by pressing F1 on the keyboard.

To hide the balloon, click the Assistant again.

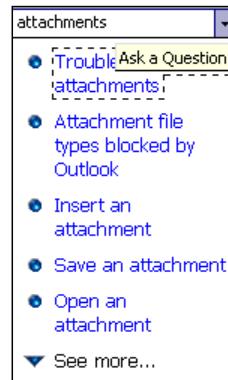

- Type a question or phrase and click the Search button.
- Scroll through the topics, if necessary, by clicking on See More or See Previous, then click on the required topic. The help text will be displayed in the Help Window.

1.9 Ask a Question Box

Word 2003 provides a convenient new alternative to using the assistant, Ask a Question Box. You can get help by typing a question or phrase in to the Ask a Question Box that you will find in the upper-right corner of the application and then pressing Enter.

If you want to repeat a question you have already typed during the current session, you can simply select the question from the drop-down list on the Ask a Question Box.

1.10 The Help Window

The Help Window provides more options than either the Assistant or the Ask a Question Box.

To access the Help Window:

Mouse

- Ensure that the Assistant is turned off and choose “Help, Microsoft Office Outlook Help” from the menu bar, or click the Help toolbar button, or press F1.

- Click on the topic you want more information about to expand it into sub-topics.
- Click on the sub-topic you are interested in to move to that specific page, on the right of the screen.

2 Mail Messages

Objectives:

By the end of this section you will be able to:

- Understand mail terminology
- Compose, address and send mail messages
- Receive and read messages
- Reply and forward messages
- Insert data into a message
- Use more than one e-mail account

2.1 Mail Messages

In order to utilise the electronic mail feature available in Outlook 2003, the user must be familiar with the terminology used to describe its various aspects

Terminology	Description
The Global Address List	The address book that contains all user, group, and distribution list e-mail addresses in your organisation. The administrator creates and maintains this address book. The Global Address List may also contain public folder e-mail addresses.
Outlook Address Book	The Outlook Address Book is automatically created from contacts in the Contacts folder. The contacts can be people inside and outside of your organization. When you update your contacts, the Outlook Address Book is updated as well.
Personal Address Book	This is a customisable address book best used to store personal distribution lists you frequently address messages to, such as a list of everyone on the racquetball team. Personal Address Book files have a .pab extension and can be copied to a disk.
Personal Distribution List	A collection of user names, identified by one unique name that is used for addressing messages to group users.

2.2 Composing mail messages

Outlook allows the user to compose new mail messages, send messages, receive messages and read incoming mail messages. The messages are the basic unit of communication within Outlook. A message can contain multiple items, one of which is the actual message. When composing a message, Outlook displays the Message form with an Options icon on the tool bar. The Message form is used to add message recipients, a message subject and the body of the message. The Options icon is used to set general, delivery and tracking options for the mail message.

Messages can be addressed to other Mail Recipients either via the Global Address List, which lists the names of the users, or if the mailbox name of the recipient is known, it can be typed into the Message form. Using the Global Address List ensures that the recipient is a valid Mail Address and that the recipient's name is correctly entered. The Global Address List is created and maintained by the Mail Administrator.

To compose a message:

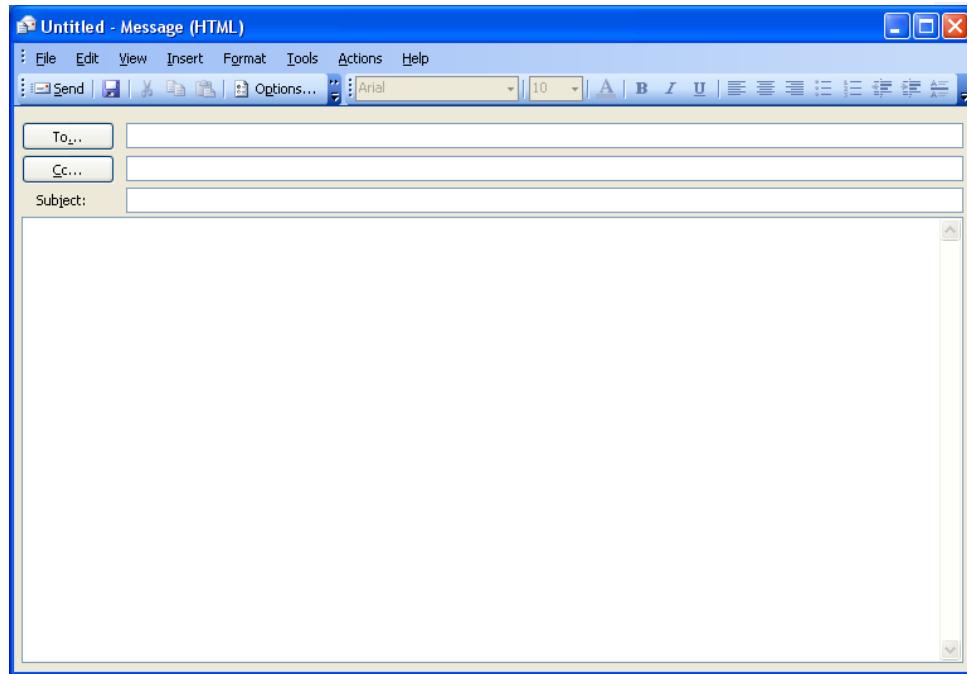

Menu

- Choose File from the menu bar, New and Mail Message.

Or

Mouse

- Click on the Inbox folder, and then click on New Mail Message icon  from the toolbar. The following window with a title and menu bar, standard and formatting toolbars and message header will appear.

The Message Header and the rest of the screen consist of the message toolbar and the following sections.

Section	Description
To	Displays the main recipient(s) of the message.
Cc	Sends a "carbon copy" of the message to the recipient(s), and the recipient's name(s) is visible to other recipients of the message.
Subject	A subject can be entered or left blank in this section. Text typed in this section is displayed in the recipient's Inbox View Pane conveying the contents and urgency of the message.
Message area	Contains the message and attachments being sent.

2.3 Addressing Messages

Messages can be sent to individual or multiple recipients. If the user knows the names of the recipients, they can be typed in the To box with each recipient name separated from the next by a semicolon, otherwise the user can select recipients from the Global Address List. The subject text typed is important, as this is displayed in the recipient's Inbox. Once the message has been addressed and the subject text typed, the user is then ready to type the message they require. The [TAB] key is used to move from one area to the next.

>To select names:

Mouse

- In the To box,
- Click the button  to select Names from the address books.

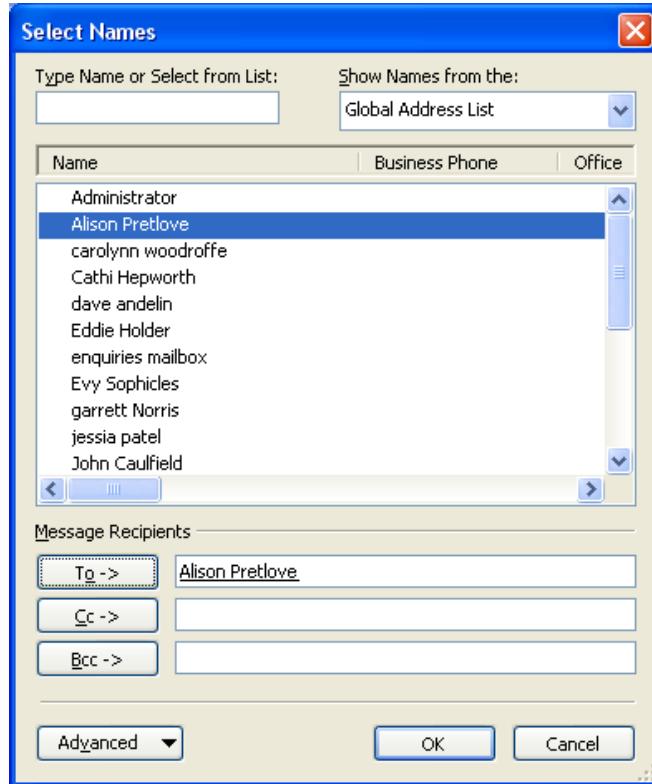

**STUDY AT
LINKÖPING UNIVERSITY, SWEDEN**
RANKED AMONG TOP 50 UNIVERSITIES UNDER 50

Interested in Engineering and its various branches? Kick-start your career with a master's degree from Linköping University, Sweden.

→ **Click here!**

 **Linköping University**

- In the Type Name or Select from List box, select the required recipient name and either double click on it or click **To ->** button to add the name to the recipient list. The [SHIFT] key can be used to select multiple names from the list. The selected recipient name(s) will display in the To Message Recipients box.
- Repeat step 2 to add further recipients and change the address book displayed at the top right corner of the select names dialog box if you need to select names from different address book.
- Select the name(s) of the recipient(s) who are to receive a copy of the message and click **Cc ->** or **Bcc ->** to add the selected names to the Cc and Bcc Message Recipients box. (The Bcc recipients will be hidden from the rest of recipients list).
- Click OK to return to the message form all the selected names will be displayed in the corresponding address fields.

Or

- You can type the names of the recipients in the address fields, as you type, Outlook will constantly search your address books for a match and as soon as a match is found, the full name will be displayed. To accept the name displayed, press [ENTER], otherwise continue to type and press [ENTER] to separate the names with a semi colon.
- Press [TAB] to move to Subject.
- Type the message subject.
- Press [TAB] to move to the Message area.

- In the Message area, type the required message

Before you send a message, Microsoft Outlook automatically checks the names you type in the To, Cc, and Bcc boxes against the names in the Address Book and against those contact folders that you've specified as Outlook Address Books. If an exact match is found, the name is underlined. If multiple matches are found, a red, wavy line appears under the name. Right-click the name to see the matches.

If multiple matches are found, and you have used the address before, the name you chose previously is displayed in the box with a green, dashed underline to remind you that there are other matches. Right-click the name to see the matches.

You can also manually check names in messages by clicking the Check Names button on the message toolbar. 

2.4 Editing Message Text

Messages can be edited using the standard Windows editing techniques. Placing the insertion point at the relevant position in the message and typing the new text can insert text. Any text to the right of the insertion point is pushed along. Selecting it and simply typing the new text can replace text. Text can be repositioned within the message by using the *Cut*, *Copy* and *Paste* procedures.

 To select text:

Mouse

- In the Message form, click and drag over the text to be selected.

 To deselect text:

Mouse

- Click away from the selected text.

 To delete text:

Keyboard

- Press [BACKSPACE] to delete any characters to the left of the insertion point.

Or

- Press [DELETE] to delete any characters to the right of the insertion point.

 To cut, copy and paste text:

Menu

- Select the text to be cut or copied.
 - Choose Edit from the menu bar, then Cut.

Or

- Choose Edit from the menu bar, then Copy.
 - Position the insertion point where the text is to be inserted.
 - Choose Edit from the menu bar, then Paste.

Mouse

- Select the text to be cut or copied.
 - To cut the selected text, click .

Or

- To copy the selected text click .
 - Position the insertion point where the text is to be inserted.
 - Click  to paste the text

2.5 Formatting text

A message can be enhanced by applying formats and changing its alignment. These changes can be made in two ways, via the Format menu or using the formatting toolbar. The Formatting toolbar is used to apply the most commonly used formats.

 To format text:

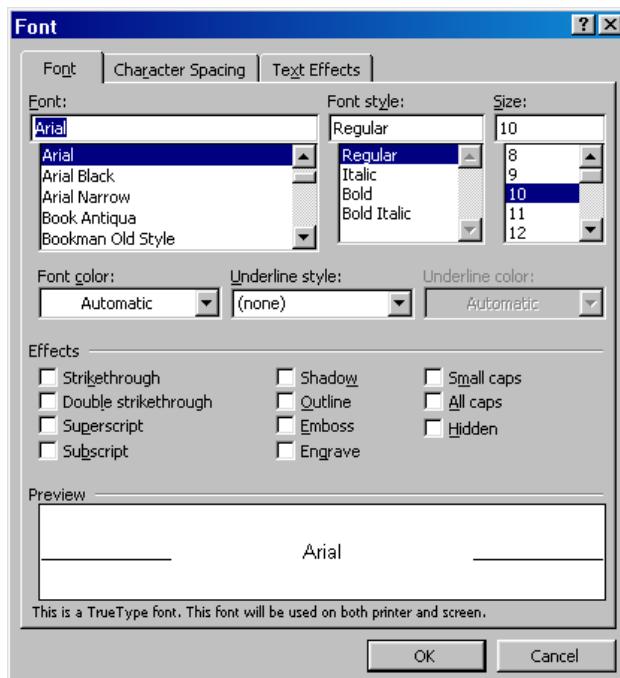

Menu

- In the Message form, select the text to format.

- Choose Format from the menu bar, then Font.

Or

- Click the right mouse button on the selected text and choose Font.
- The Font dialog box displays.

Font Options	Description
Font	Displays the fonts available for the current printer. Font refers to the design of the typeface.
Font Style	Displays the styles available for the selected font.
Size	Displays the available sizes of the selected font. The larger the size, the bigger the text.
Font Color	Displays a variety of colours that can be applied to the selected text.
Underline style and Underline colour	Underlines all characters, including spaces between words with a single line style with the option of selecting a colour underline.
Effects	Displays a combination of effects to be applied to the selected font.
Preview	Displays a sample of text with the selected formats for the user to view before applying to selected text.

- Choose the formatting features required.

- Choose OK.

Mouse

- Select the text to format.
- Click the required formatting button on the Formatting toolbar.

Paragraph Alignment

Paragraph alignment aligns selected text relative to the left and right margins. If no text is selected, the paragraph containing the insertion point is aligned.

Menu

- In the Message form, select the text required.
- Choose Format, Paragraph

Or

- Click the right mouse button on the selected text and choose Paragraph. The Paragraph dialog box displays.

UPPSALA
UNIVERSITET

Develop the tools we need for Life Science Masters Degree in Bioinformatics

Bioinformatics is the exciting field where biology, computer science, and mathematics meet.

We solve problems from biology and medicine using methods and tools from computer science and mathematics.

Click on the ad to read more

Option	Description
Left	Aligns text to the left margin.
Centre	Centres text between the left and right margins.
Right	Aligns text to the right margin.
Justify	Aligns text equally between the left and right margins.
Bullet	Inserts a bullet at the left margin preceding each selected paragraph. The first line of text following a bullet is automatically indented to the first tab position.

- Choose the required alignment.
- Choose **OK**.

Mouse

- Select the text required.
- Click the required alignment button from the Formatting toolbar.

2.6 Spelling and Grammar Checker

Outlook has the facility to check the spelling of any item including mail messages. When the Spell Checker is started, any incorrect spellings are highlighted and alternative suggestions displayed. The Spelling option can be set to check all messages automatically before they are sent.

To spell check a mail message:

Menu

- In the Message form, choose Tools from the menu bar, then Spelling and Grammar. The Spelling dialog box displays, highlighting the first incorrect word.

Option	Description
Not in Dictionary	Displays the first incorrect word.
Suggestions	Lists proposed words from the dictionary.
Ignore Once	Leaves the highlighted error unchanged throughout the message.
Ignore All	Leaves all instances of the highlighted error unchanged throughout the document and continues to check the document. Word will ignore this spelling error or type of grammar error throughout the rest of the current Word session.
Add to Dictionary	Adds the highlighted word to the dictionary.
Change	Changes the word to the selected word shown in the "Change to" box. When the selected error is a duplicate word, the Change button is replaced with a Delete button.
Change All	Changes all instances of the highlighted word to the selected word in the "Change to" box.
Auto correct	Adds the spelling error and its correction to the AutoCorrect list so that Word will correct it automatically as you type.
Options	Opens the Spelling & Grammar Options dialog box, where you can open a different custom dictionary or change the rules that Word uses to check spelling and grammar.
Undo	Reverses the last spelling change.

Check grammar	Clear this check box if you don't want Word to check the grammar in the active document.
---------------	--

- Choose the required options.

Keyboard

- Press [F7]
- Choose the required options.
- The Spelling dialog box automatically closes on completion and a dialog box displays, confirming that the spell check is complete.

 **To set spelling options:**

Menu

- In the Inbox folder, choose Tools from the menu bar, then Options. The Options dialog box displays.
- Choose the **Spelling** tab.
- Set the required options and click OK.

2.7 Sending Messages

Once the user has composed a mail message, the message can then be sent to the relevant recipients.

 **To send a message:**

Menu

- Compose the message.
- Choose File from the Menu bar, then click Send. The message is dispatched to the recipients.

Mouse

- Compose the message.
- Click  The message is sent to the recipients.

 **To view sent messages:**

Mouse

- In the Navigation Pane, select the **Sent Items** folder.
- A list of messages sent will display in the View Pane.

2.8 Saving unsent messages

Messages can be composed and saved to the Draft folder. When the message is ready to be sent, it can be opened from draft, edited and sent.

 **To save message as a Draft:**

Mouse

- Compose the message.

- In the Message form, click or press Esc to close the window and choose Yes to save changes to the item.
- The saved message displays in the Draft folder with a symbol attached to it.

Menu

- Compose the message.
- In the Message form, choose File, Close and choose Yes to save changes to the item.

To open unsent messages:**Mouse**

- In the Draft folder, double-click on the message to open.
- Make any amendments to the message.
- To send the message, click

Cancelling messages

If the user chooses not to send a composed message, it is easily cancelled.

To cancel a message:**Mouse**

- Compose the message.
- In the Message form click or press Esc to close the window.
- Choose No to save the changes to the item. The Message form automatically closes without sending or saving the message.

2.9 Receiving and reading mail messages

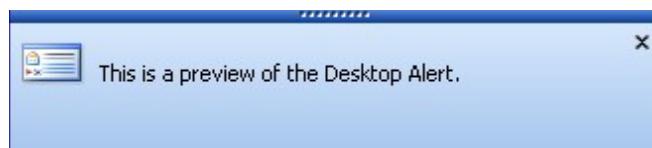

All incoming mail messages are automatically stored in the user's Inbox folder, making it easier for the user to find incoming mail. When the contents of the Inbox folder is displayed in the View Pane, column headings display informing the user of any messages that have been received. The column headings display the sender, subject details and the date and time the message was received. By default, Outlook automatically applies the *Messages with AutoPreview* to the Inbox. This view allows the user to see the first three lines of a message without having to physically open it.

You can get Outlook to notify you in different ways when new messages arrive

To notify when new messages arrive**Mouse**

- Choose the Tools menu and click Options.
- Click the Preferences tab, and then click E-Mail Options.
- Click Advanced E-Mail Options and in the When new items arrive section select:
 - Play a sound.
 - Briefly change the mouse cursor.
 - Show an envelope icon in the notification area

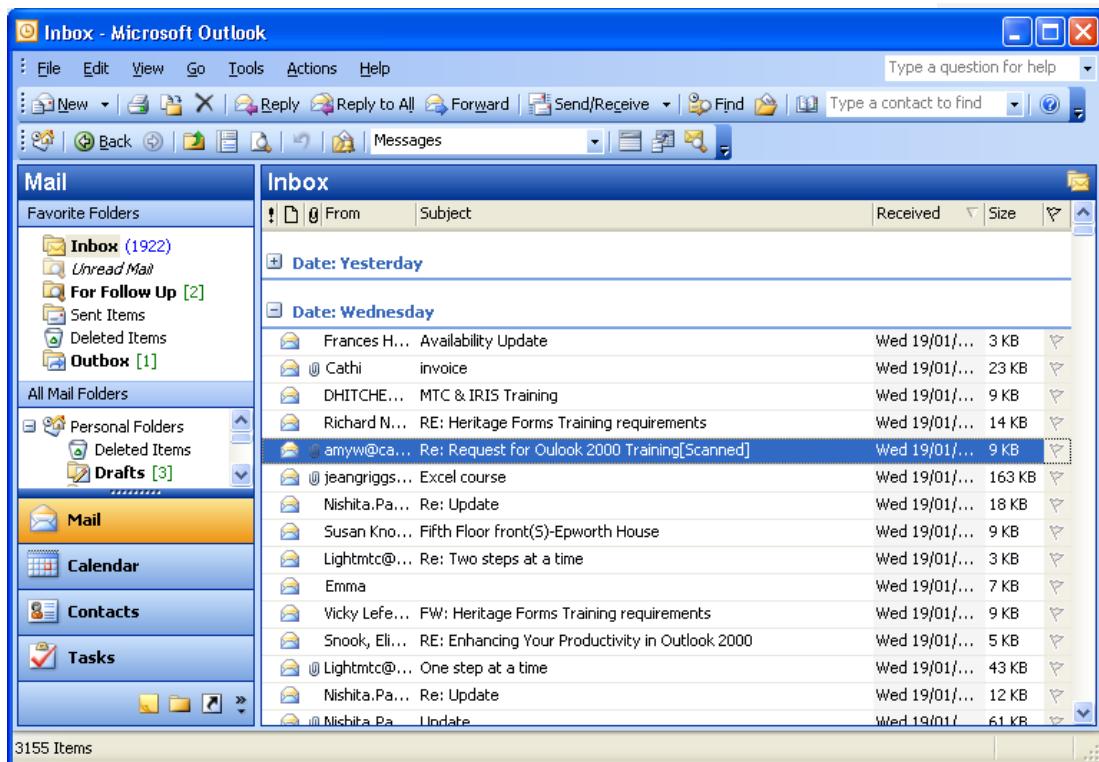

- Display a New Mail Desktop Alert.

Any unread messages are displayed in bold in the View Pane. When a message is opened, it is displayed in the Message form allowing the user to view the previous or next message in the listing without going back to the Inbox.

To open a mail message:

- In the Navigation Pane, choose Inbox.
- All messages received are displayed in the right hand side of the window in the View Pane.

- Messages are automatically grouped under day and week headings to make it easier to find them. You can click the + and - signs to expand and collapse the groups to show and hide the messages in them.
- Double-click on the required message in the list. The Message form opens, displaying the selected message.

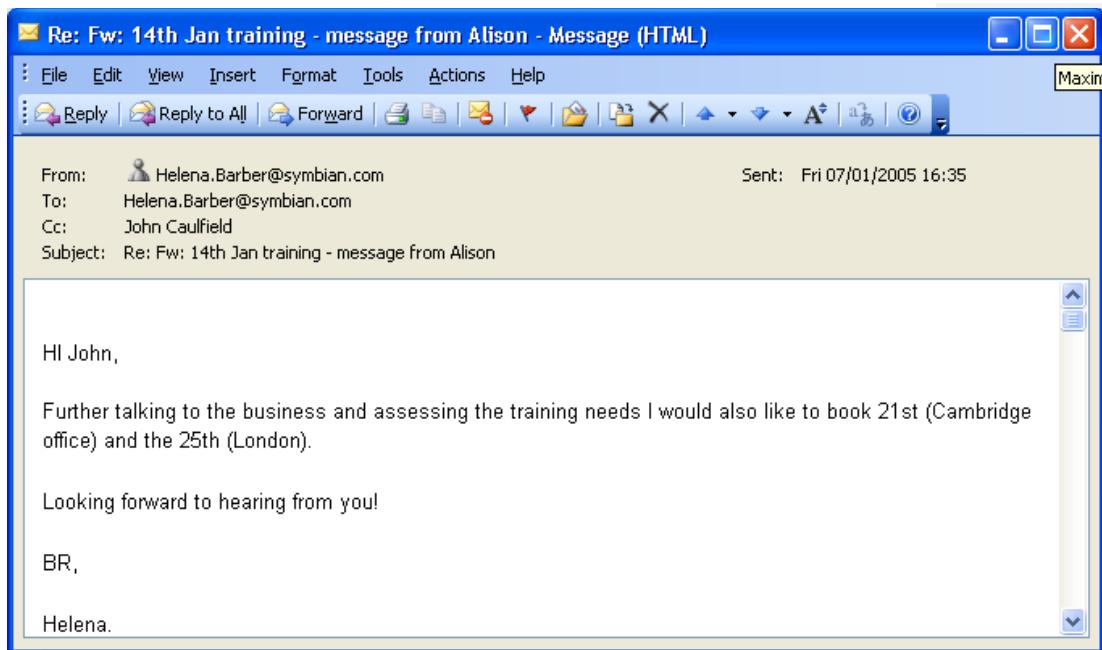

Menu

- In the View Pane, select the message required.

- Choose File from the Menu bar, then click Open.

Or

- Double Click on the message.
- The Message form opens, displaying the selected message.

2.10 Moving between messages

In the Message form, it is possible to view any previous messages or messages that follow the current message without having to return to the View Pane.

 **To view the previous message:**

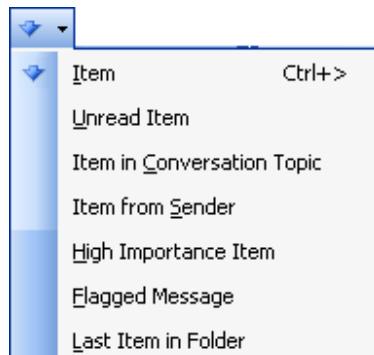

Mouse

- In the Message form, click  . The previous message from the View Pane displays.

 **To view the next message:**

 **Mouse**

- In the Message form, click  . The previous message from the View Pane displays.

You can click the down arrows next to the Next and Previous buttons to browse by different attributes of messages.

 **To close the message form:**

Menu

- Choose File from the Menu bar, then click Close.

Or

Mouse

- Click  or Use the Esc key on the keyboard.

2.11 Replying to and forwarding messages

Once a message has been read, the user can, if required, reply to just the message sender or reply to the message sender and all recipients of the original message. When replying to a message using the Reply to Sender or the Reply to All option, the reply message is automatically addressed to the originator of the message. The Reply form also displays the original message and the subject details of the message with the prefix RE:. The reply to the message can be typed above, below or in the body of the original message. Reply text is in blue.

To Reply to a Message:

Mouse

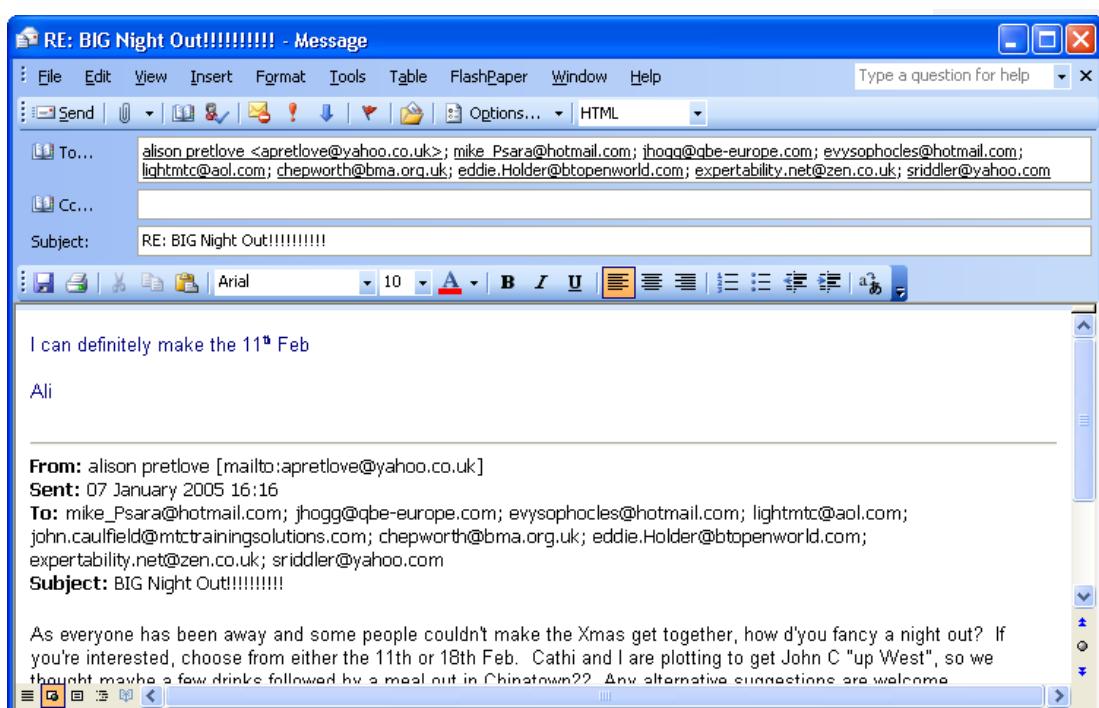

- In the Inbox folder, select the message to reply to.
- To reply to the sender, click 

Or

- To Reply to All, click 
- The RE: message form displays. Type a reply message.
- Click 

Menu

- In the Inbox folder, select the message to reply to.
- Choose Compose, Reply or Reply to All.
- Click the right mouse button on the selected message, choose Reply or Reply to All.
- The RE: message form displays. Type the reply message.
- Choose File, Send.

2.12 Forwarding Messages

Once a mail message has been read it can be *forwarded* to other Mail Users. The sender's own comments can be added to the message before it is sent to other members. As with replying to messages, the subject of the original message is automatically entered in the Subject box with a prefix, in this case FW: indicating that the message is a forwarded message. When forwarding a message the original message with the address information is automatically entered in the Message area.

To Forward a Message:

Mouse

- In the Inbox folder, select the required message.
- Click  **Forward**. The FW: message form displays.
- Click  **To...**. The Select Names dialog box displays.
- Select the names of the recipients to receive the forwarded message.
- If required, type a message in the Message area.
- Click  **Send**

Menu

- In the Inbox folder, select the required message.
- Choose Actions from the menu bar, Forward

Or

- Click the right mouse button on the selected message, choose Forward.
- The Fw: message form displays. Follow steps 3 to 6 as mouse method.

2.13 Inserting data into a message

Information can be inserted or copied into other messages. Objects and files from other Windows applications be inserted into messages.

To copy information between messages

The advertisement features a woman with long dark hair smiling in the foreground, with a wind turbine in the background. The text "Brain power" is displayed prominently. On the right side, there is descriptive text about wind energy and SKF's role in it. At the bottom left, there is a call to action to visit their website. The SKF logo is at the bottom right.

Brain power

By 2020, wind could provide one-tenth of our planet's electricity needs. Already today, SKF's innovative know-how is crucial to running a large proportion of the world's wind turbines.

Up to 25 % of the generating costs relate to maintenance. These can be reduced dramatically thanks to our systems for on-line condition monitoring and automatic lubrication. We help make it more economical to create cleaner, cheaper energy out of thin air.

By sharing our experience, expertise, and creativity, industries can boost performance beyond expectations.

Therefore we need the best employees who can meet this challenge!

The Power of Knowledge Engineering

Plug into The Power of Knowledge Engineering.
Visit us at www.skf.com/knowledge

SKF

Menu

- Open the required message to copy information from.
- In the Message area, select the text to be copied.
- Choose Edit from the Menu bar and then Copy

Or

- Click the right mouse button over the selected text and choose Copy from the resulting short cut menu.
- The copied item is stored in memory.
- Choose File from the Menu bar, then Close to close the message.
- Open the message to copy the information into

Or

- Compose a new message.
- Position the insertion point in the Message area.
- Choose Edit from the Menu bar, then Paste

Or

- Click the right mouse button in the Message area and choose Paste from the resulting short cut menu.
- The selected text is pasted into the message.

 To copy information from a file:**Menu**

- Open the required application and document.
- Select the required information to be copied.
- Choose Edit from the Menu bar, then Copy.
- Close the document and application.
- In Outlook, compose a message

Or

- Open an existing message.
- Position the insertion point in the Message area.
- Choose Edit from the Menu bar, then Paste

Or

- Click the right mouse button in the Message area and choose Paste from the resulting short cut menu.
- The copied information is inserted at the insertion point.

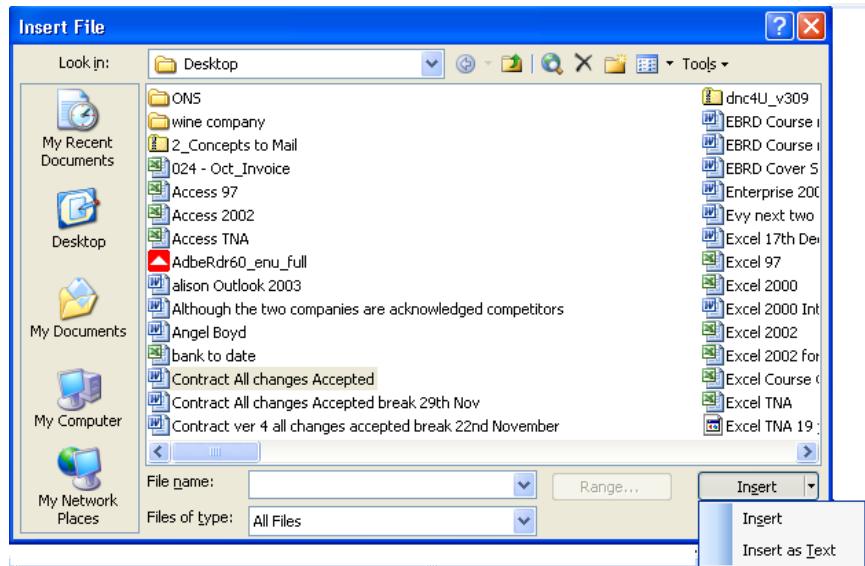

Attaching files and objects to a message

One or more files or objects can be attached to a message.

 To attach a file to a message:

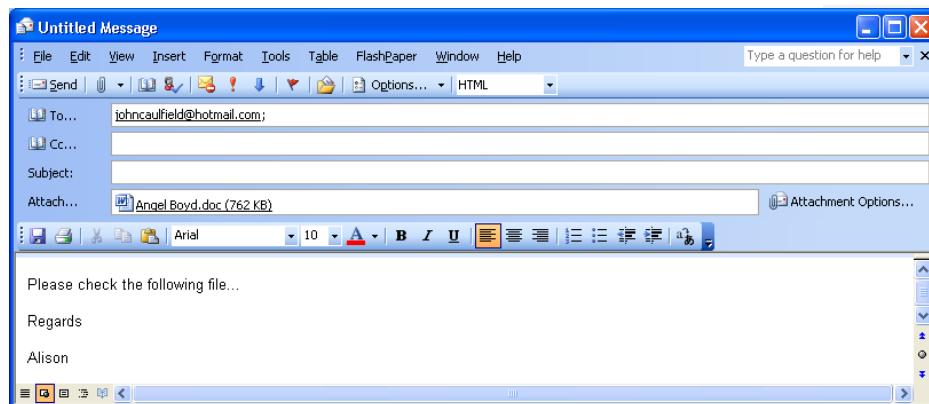

Menu

- Compose a new message or open an existing message.
- In the Message area, choose Insert from the Menu bar, then File. The Insert File dialog box displays.

- In the **Look in** box, select the drive required.
- Select the folder and filename required.
- Click on the Insert drop down arrow to select the method you want to insert the file.

The attached file displays in the Message header under Attach...

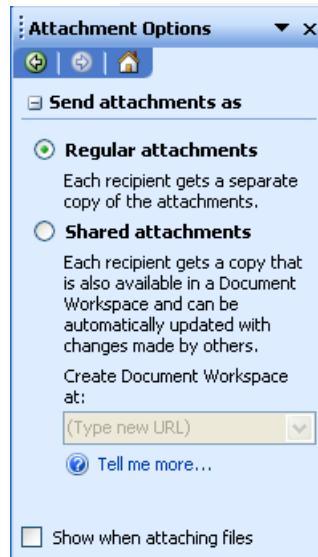

Mouse

- Compose a new message or open an existing message.
- In the Message area, click . The Insert File dialog displays.
- Follow steps 3 to 6 as menu method.

 To set attachment options:

Mouse

- Click the Attachment Options button to the right of the listed attachment(s) in the message header. The Attachment Options task pane appears on the right of the screen
- Select the type of attachment you wish to create.
- Click the X to close the task pane and keep your settings.

Trust and responsibility

NNE and Pharmaplan have joined forces to create NNE Pharmaplan, the world's leading engineering and consultancy company focused entirely on the pharma and biotech industries.

Inés Aréizaga Esteva (Spain), 25 years old
Education: Chemical Engineer

– You have to be proactive and open-minded as a newcomer and make it clear to your colleagues what you are able to cope. The pharmaceutical field is new to me. But busy as they are, most of my colleagues find the time to teach me, and they also trust me. Even though it was a bit hard at first, I can feel over time that I am beginning to be taken seriously and that my contribution is appreciated.

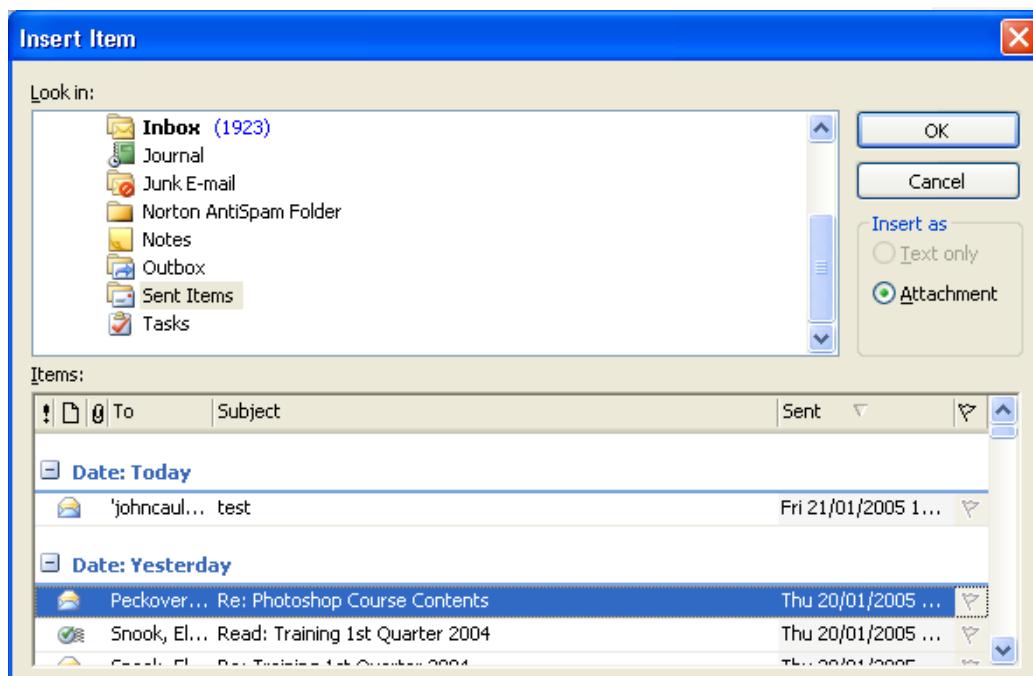

NNE Pharmaplan is the world's leading engineering and consultancy company focused entirely on the pharma and biotech industries. We employ more than 1500 people worldwide and offer global reach and local knowledge along with our all-encompassing list of services.

nne pharmaplan®

 **To insert an Outlook item in message:**

Mouse

- Click the down arrow next to the paperclip icon on the toolbar.
- Choose Item.

- Select the item you wish to insert and click OK. The item will be inserted as an attachment or text depending on which Insert As option you selected.

 **To attach an object to a message:**

Menu

- Compose a new message or open an existing message.
- In the Message area, choose Insert from the Menu bar, then Object. The Insert Object dialog box displays.
- Choose **Create from File** and choose **Browse**.
- Select the drive, folder and file containing the object and click Insert.
- To display the object as an icon in the Message area, choose **Display as Icon**. Ensure the tick box is ticked.
- Choose OK. The attached object displays in the Message area as an application icon.

Opening attached files:

When a message with an attachment is received, the attachment is represented in the Inbox by a paper clip. Attached files can be opened from a message as long as the corresponding application is available.

 **To open an attachment:**

Mouse

- Open the message containing the attachment.
- In the Message area, double-click on the application icon. The application the attachment belongs to opens and loads the file.
- When finished, exit the application in the normal way.

Saving an attachment

If the user wishes to keep an attached file, it can be saved to a folder or to a floppy disk.

To save an attachment:**Mouse**

- Open the message containing the attachment.
- In the Message Header area, double-click on the Application icon. The application the attachment belongs to opens and loads the file.
- Choose File from the Menu bar, then Save As.
- Select the drive and folder to save the file to.
- If required, type a new filename.
- Choose **Save**.
- On completion, exit the application in the usual way.

Or

- Right click the attachment icon in the message header and choose Save as.
- Select the drive and folder to save the file to.
- If required, type a new filename.
- Choose **Save**.

2.14 E-Mail Accounts

You can get the e-mail service you need by adding an e-mail account to Microsoft Outlook using the information provided to you by your administrator or Internet service provider (ISP). Depending on your needs, you can add several e-mail accounts to a single Outlook user profile. For example, you can add a Microsoft Exchange Server account to handle your business e-mail and then add an Internet e-mail account, such as Hotmail, to handle your personal e-mail.

Outlook supports the following types of e-mail servers:

Microsoft Exchange Server

Internet E-mail: POP3, IMAP, HTTP

Additional Server Types

To get started with an e-mail account, you need to tell Outlook:

Type of account (Exchange Server, POP3, IMAP, HTTP, or other)

Name of your incoming server and outgoing server

Your user name Your e-mail address (for example: *username@provider.com*)

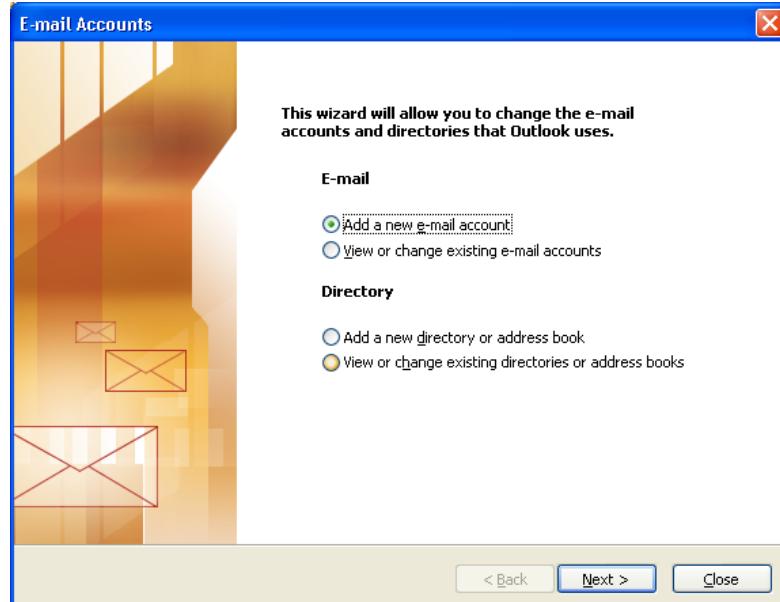

Your password

Add an e-mail account

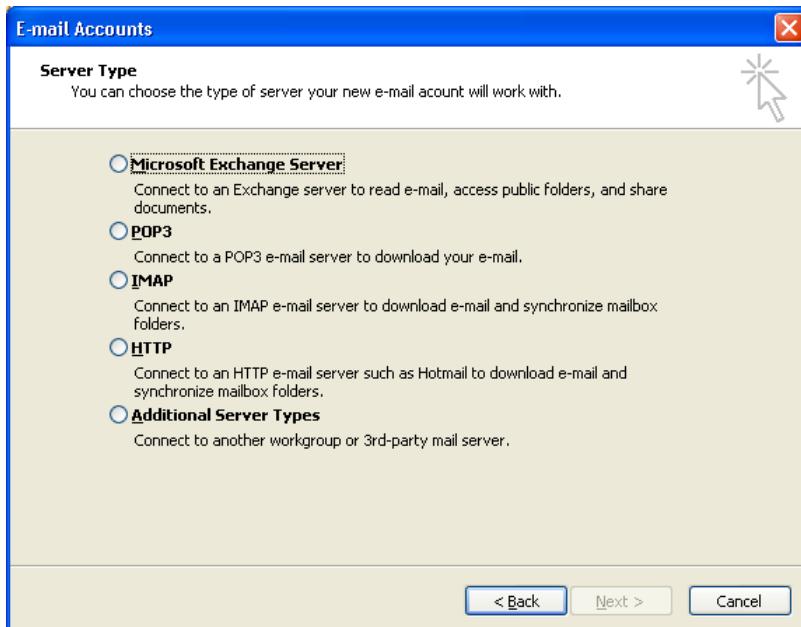

To add an e-mail account

Mouse

- On the Tools menu, click E-mail Accounts, select Add a new e-mail account, and then click Next.

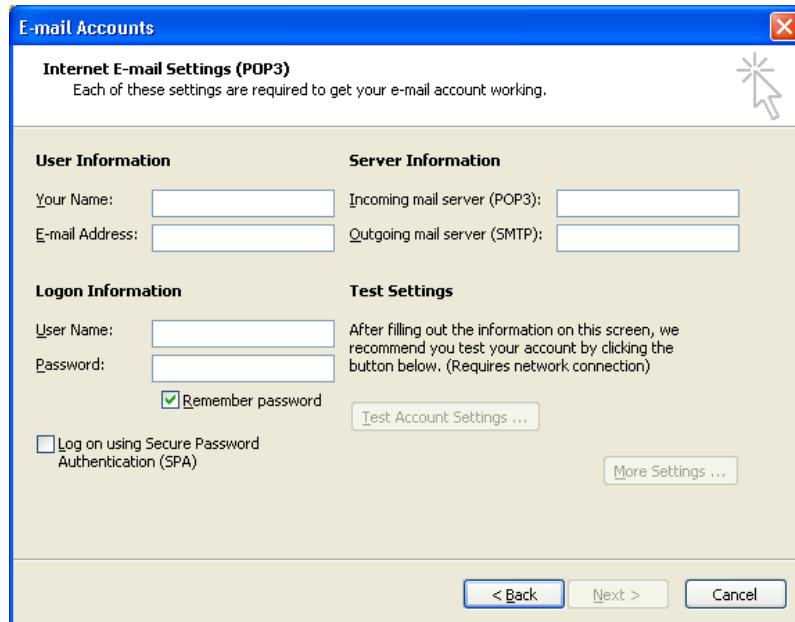

- Select the e-mail server used for your account, and then click Next.

- In the appropriate boxes, type the information given to you by your Internet service provider (ISP) or administrator. If you want to use Microsoft Outlook to connect to a Hotmail server, all you need to know is your Hotmail e-mail address and password.

Unless your ISP has indicated that your service uses Secure Password Authentication (SPA), do not select the Log on using Secure Password Authentication (SPA) check box.

Unless specified by your ISP, all server and address entries are typed in lowercase letters. Some ISPs require a combination of lowercase and uppercase letters for passwords to add further security. For example, passWorD. Check with your ISP to see if it requires a case-sensitive password.

You have the option of having Outlook remember your password by typing it in the Password box and selecting the Remember password check box. While this means that you won't have to type in your password each time you access the account, it also means that the account is vulnerable to anyone who has access to your computer.

If you are adding a Microsoft Exchange Server account, click Check Names to verify that the server recognises your name. The name and server you entered should become underlined. Be sure your computer is connected to your network. If your name does not become underlined, contact your administrator.

If you are adding a POP3 server account, click Test Account Settings to verify that your account is working. If there is missing or incorrect information, such as your password, you will be prompted to supply or correct it. Be sure your computer is connected to the Internet.

- If you want to configure additional settings, such as how you want your computer to connect to your e-mail server, click More Settings. Otherwise, click Next and click Finish. The new mail account will appear in the Navigation Pane.

Remove an e-mail account

To remove an e-mail account

Mouse

- On the Tools menu, click E-mail Accounts, select View or change existing e-mail accounts, and then click Next.
- Click the e-mail account you want to delete, and then click Remove.
- Click Finish.

Make an e-mail account the default

If you are using more than one account, you can specify which account is the default so that it will be the first account to be processed. Microsoft Outlook sends your messages using the default account unless you click the Accounts button (next to the Send button) on the message to choose another account to use for that message.

To make an e-mail account the default

Mouse

- On the Tools menu, click E-mail Accounts.
- Select View or change existing e-mail accounts, and then click Next.
- In the list, click the e-mail account you want, and then click Set as Default.

Have replies sent to a different e-mail account

You can specify a different account to be used when a recipient sends a reply to your message. For example, if you send a message and then go on holiday to visit a friend, you can tell Microsoft Outlook to send replies to your message to your friend's account.

To have replies to your messages sent to a different account

Mouse

- On the Tools menu, click E-mail Accounts.
- Select View or change existing e-mail accounts, and then click Next.
- In the list, click the e-mail account that you send the message from, and then click Change.
- Click More Settings, and then, in the Reply E-mail box, type the e-mail address of the account that you want replies sent to.

2.15 Change an e-mail account name

An e-mail account name is the name that appears in the list of e-mail accounts you have created. If you use more than one e-mail account, when you create a new message you can click the Accounts button (next to the Send button) to see the list of accounts and choose which to use to send the message.

To change a e-mail account name

Mouse

- On the Tools menu, click E-mail Accounts.
- Select View or change existing e-mail accounts, and then click Next.
- In the list, click the e-mail account you want, and then click Change.
- Click More Settings, and then type a new name for the account in the box.
- You can name the e-mail account anything you want.

Sharp Minds - Bright Ideas!

Employees at FOSS Analytical A/S are living proof of the company value - First - using new inventions to make dedicated solutions for our customers. With sharp minds and cross functional teamwork, we constantly strive to develop new unique products - Would you like to join our team?

FOSS works diligently with innovation and development as basis for its growth. It is reflected in the fact that more than 200 of the 1200 employees in FOSS work with Research & Development in Scandinavia and USA. Engineers at FOSS work in production, development and marketing, within a wide range of different fields, i.e. Chemistry, Electronics, Mechanics, Software, Optics, Microbiology, Chemometrics.

We offer
A challenging job in an international and innovative company that is leading in its field. You will get the opportunity to work with the most advanced technology together with highly skilled colleagues.

Read more about FOSS at www.foss.dk - or go directly to our student site www.foss.dk/sharpminds where you can learn more about your possibilities of working together with us on projects, your thesis etc.

Notes

3 Message Options

Objectives:

By the end of this section you will be able to:

- Set importance and sensitivity
- Ask for a read and delivery receipts
- Ask others to vote
- Divert replies
- Set delivery and expiry dates
- Flag messages for follow up
- Create an Autosignature

"I studied English for 16 years but...
...I finally learned to speak it in just six lessons"

Jane, Chinese architect

Click on the ad to read more

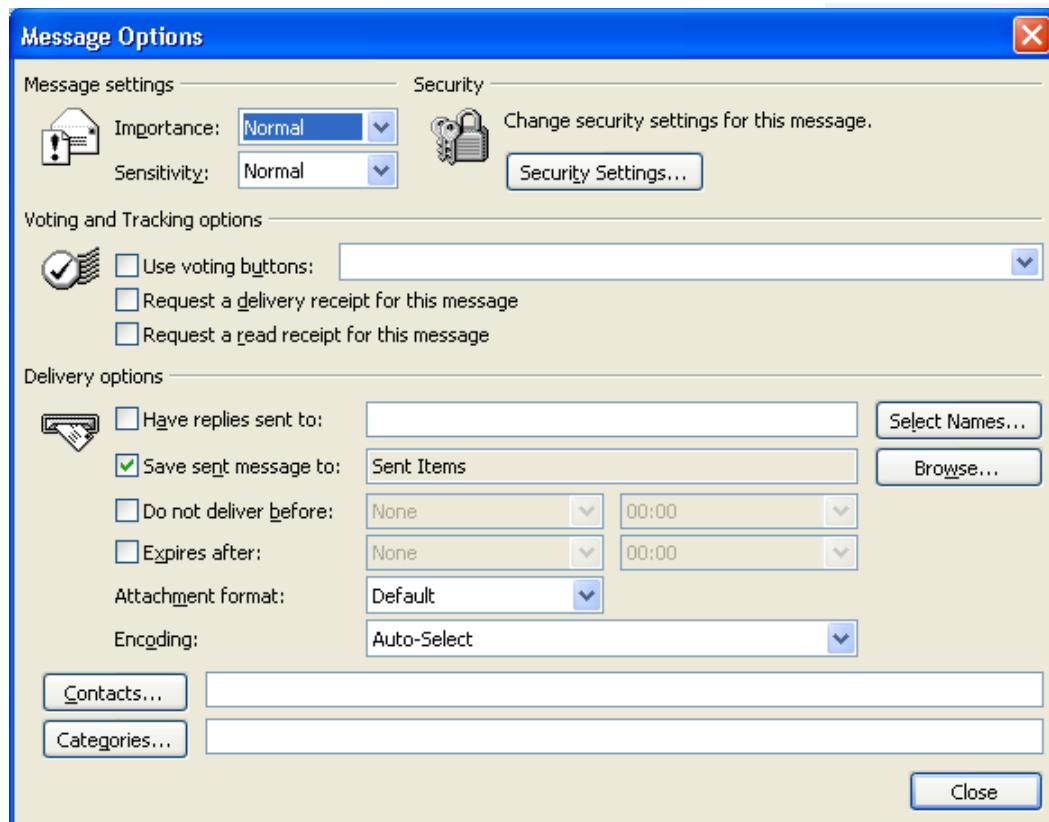

3.1 Message Options

When composing a message, the user can set various message options before a message is sent.

To set message options:

Mouse

- Choose New Message and Click the  Options... icon.

3.2 Importance

Contains three levels of message importance or priority: high, normal and low. Setting message priorities affects how the message is routed from source to destination. High priority messages are routed to their destinations before normal messages, and low priority messages are transmitted last. The default setting in Outlook is normal. A symbol displays in the recipient's View Pane indicating the message importance. High displays a red exclamation mark in the recipient's Inbox, Low displays a down arrow in the recipient's Inbox. Normal messages have no symbol against them.

Change the importance level

Mouse

- Click the importance drop-down arrow and select High or Low or click  for very important or  not important.

3.3 Sensitivity

You can mark your messages as Personal, Private or Confidential and the banner in message header will display the selected option.

Define the sensitivity

Mouse

- Click the sensitivity drop-down arrow and select Personal, Private or Confidential.

Marking a message Private prevents the message from being modified after you send it.

3.4 Ask others to vote in a message

You can send out mail messages that need recipients to respond in a preset way. Microsoft Outlook calls this “voting”. When you set voting options in a message, Outlook creates buttons relating to the options that you specify for the recipients to click. You can then track the results by viewing the votes.

To set Voting Options:

Mouse

- Select the Use voting buttons check box, and then click the voting button names you want to use in the box.

To create your own voting button names, delete the default button names, and then type any text you want. Separate the text with semicolons. For example: Small; Large; Extra Large.

- Close and de-select the Save sent message to** check box, and then enter the folder name where you want the message saved and Close.
- Click Send.

View vote responses to a message

To review the results of the voting, you use Outlook’s tracking.

To track voting responses:

Mouse

- Open the original message with the vote in it. This is usually in the Sent Items folder.
- Click the Tracking tab.

By default, responses that do not contain comments are recorded in the original message, and the responses are kept in the Inbox. To automatically delete the response messages, on the E-mail tab in the Options dialog box (Tools menu), select the Delete receipts and blank responses after processing check box.

To Copy the results of voting responses:

Mouse

- View the voting responses.
- Select the responses you want to copy. To select all rows, click the first row, and then hold down [SHIFT] and click the last row.

Or

- To select nonadjacent rows, click the first row, and then hold down [CTRL] and click additional rows.
- On the Edit menu, click Copy.
- Switch to the other program or to the text box of the item you want to copy the information to.
- On the Edit menu, click Paste.

3.5 Read and Delivery Receipts

Outlook can notify when messages are delivered or read by returning a message to you verifying the date and time the message arrived at the mailbox of the recipient “Delivery Receipt” or verifying the date and time the message was opened by the recipient “return Receipt”.

To be notified about a message

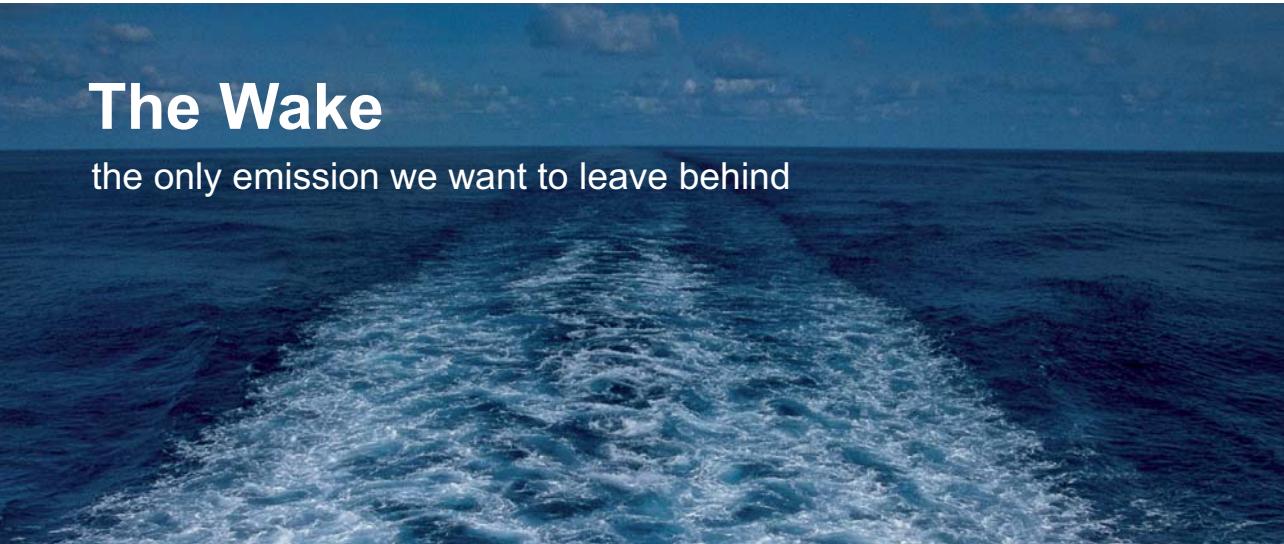

Mouse

- Under Voting and tracking options, select the Request a delivery receipt for this message or the Request a read receipt for this message check box.

3.6 Have replies sent to

Outlook can send replies to a particular message to someone else, such as an assistant.

To have replies sent to some body else

The Wake
the only emission we want to leave behind

Low-speed Engines Medium-speed Engines Turbochargers Propellers Propulsion Packages PrimeServ

Engineering the Future – since 1758.
MAN Diesel & Turbo

Mouse

- Check the Have replies sent to box and type the name of the person you want to receive the reply messages in the space provided or click Select Names button to select the name from an address book.

3.7 Do not deliver before

When used, this option keeps the message in the sender's Outbox folder until the date and time specified.

To not to deliver a message before a specific date**Mouse**

- Check the Do not deliver before box and specify the date and the time when you want the message to be delivered.

3.8 Expiry Date

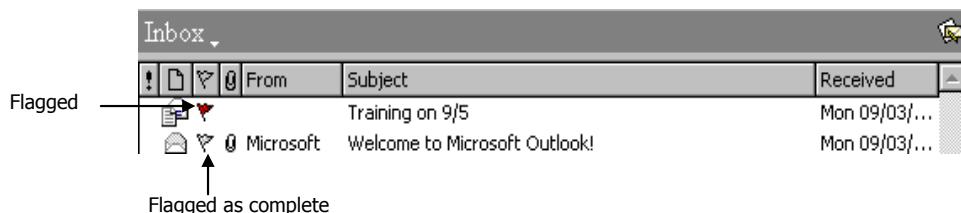

This option makes the message unavailable by deleting the message after the specified date and time provided the recipient(s) has not read it.

To set an expiry date**Mouse**

- Check the Expires after box and specify the date and the time when you want the message to become unavailable.

3.9 Flagging Messages

The user can flag a message to remind them to follow up the message or they can flag a message with a request for the recipient to follow it up. When a message is flagged, an icon displays in the Flag Status column of the View Pane.

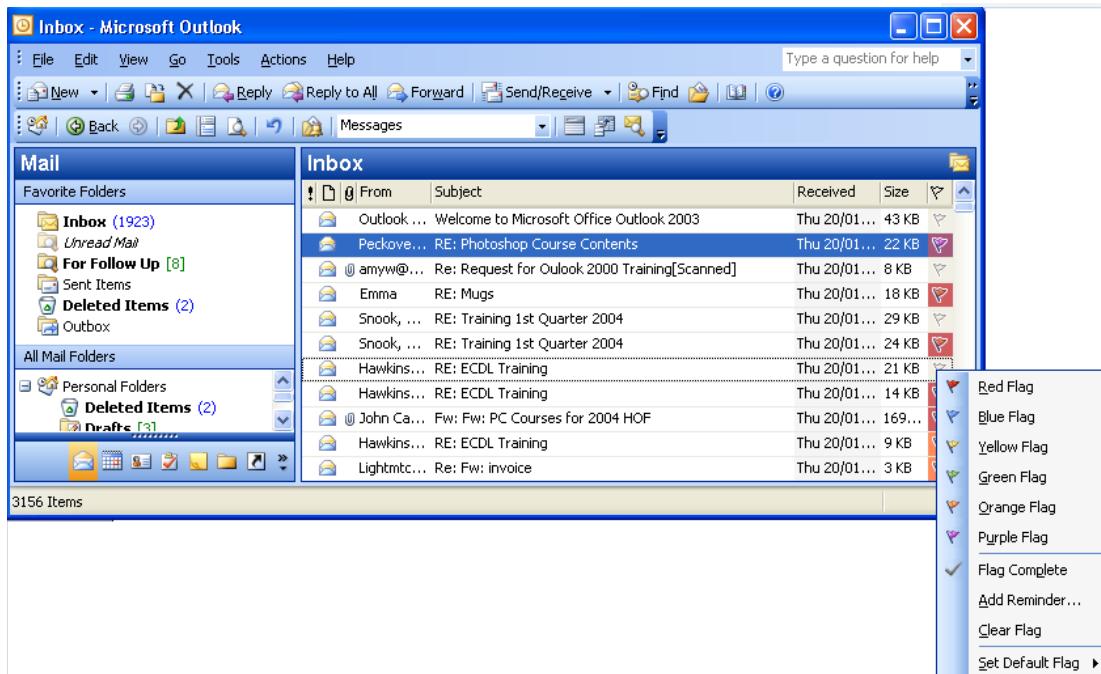

**To flag a message:****Mouse**

- From the View Pane, click the flag symbol next to the message you wish to flag. The flag will turn red.

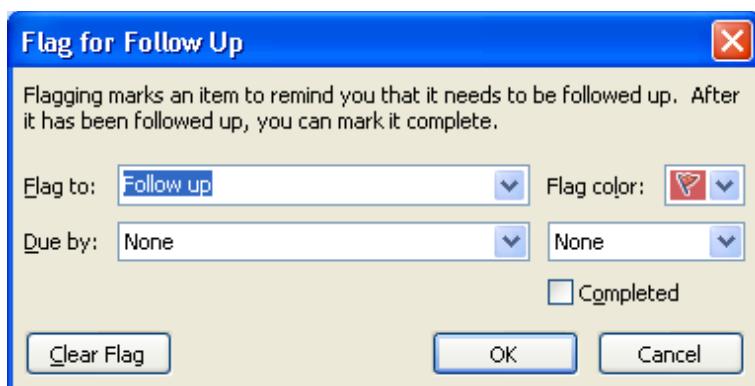

To set different colour flags for messages:

Mouse

- From the View pane, right-click over the flag symbol next to the message you wish to flag, select the colour flag you require. The flag will appear next to the message.

**To add a reminder to a flag:****Mouse**

- From the View pane, right-click the flag symbol next to the message you wish to set the reminder for.
- Choose Add reminder from the shortcut menu.

- Set the options you require in the dialog box.
- To assign a due date to the flag, in the **Due By** box select the date required.
- Choose OK.

- When the recipient receives a message with a flag, a comment on the purpose of the flag appears at the top of the message.

 Follow up by 14 March 1998 17:00.
Completed on 09 March 1998 16:49.

Or

Menu

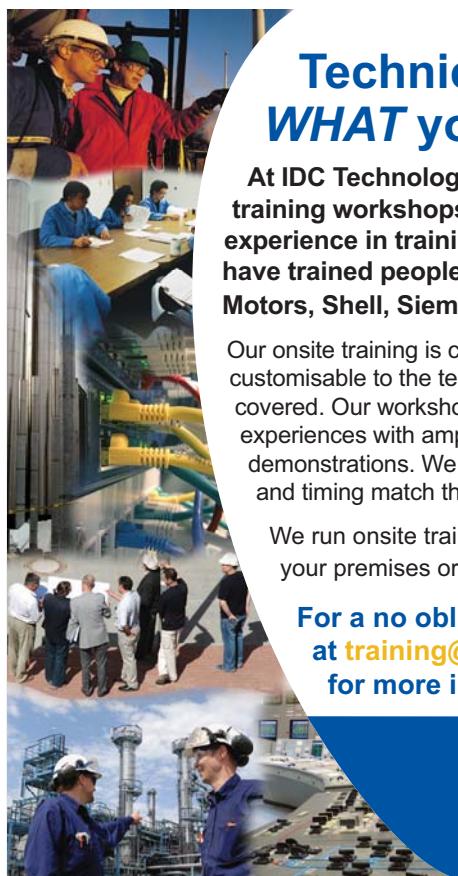

- Open the message to flag or compose a new message.
- Click  icon on the standard toolbar and type a flag, e.g. write a report.
- Set all other options as above and click OK.

By default, overdue items appear in red.

To Flag a Message as Complete:

Mouse

- Right-click over the flag symbol next to the message you wish to flag as complete and choose Flag complete from the shortcut menu

Technical training on **WHAT** you need, **WHEN** you need it

At IDC Technologies we can tailor our technical and engineering training workshops to suit your needs. We have extensive experience in training technical and engineering staff and have trained people in organisations such as General Motors, Shell, Siemens, BHP and Honeywell to name a few.

Our onsite training is cost effective, convenient and completely customisable to the technical and engineering areas you want covered. Our workshops are all comprehensive hands-on learning experiences with ample time given to practical sessions and demonstrations. We communicate well to ensure that workshop content and timing match the knowledge, skills, and abilities of the participants.

We run onsite training all year round and hold the workshops on your premises or a venue of your choice for your convenience.

Completed items appear with a tick in the flag column

To Clear a Flag:

Mouse

- Right-click the flag symbol next to the message whose flag you wish to clear. Choose Clear flag from the shortcut menu.

Menu

- Open the flagged message.
- Click  icon on the standard toolbar.
- Click Clear Flag.

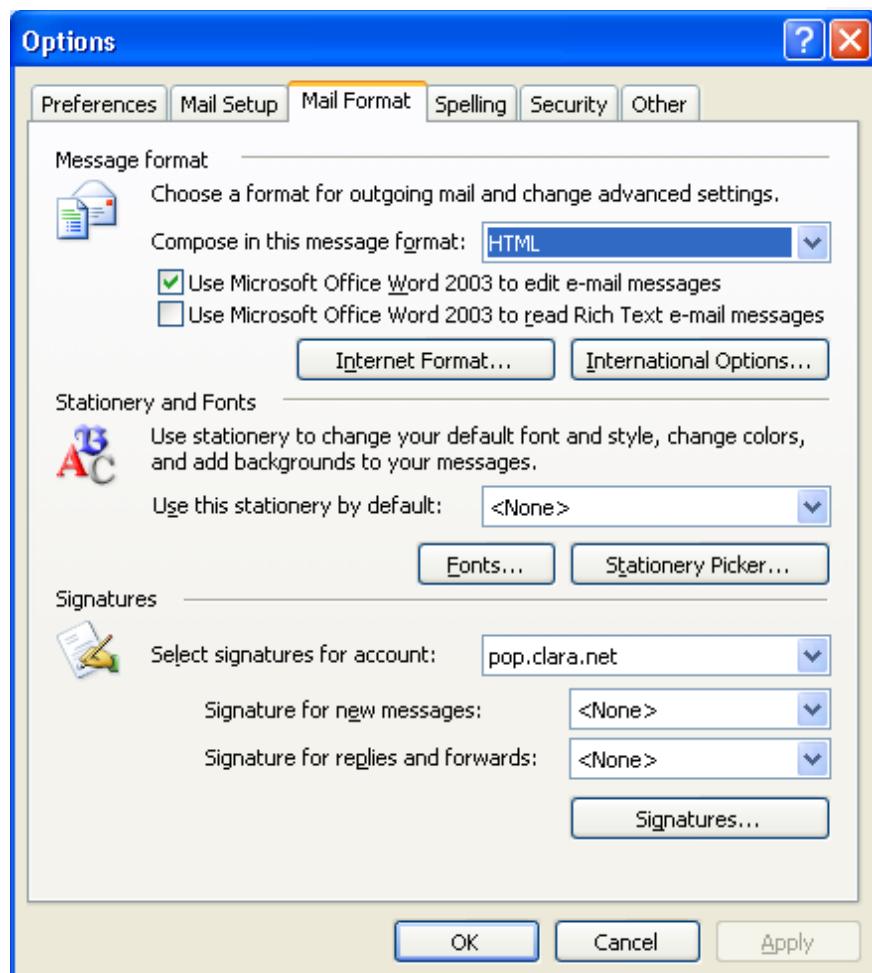

3.10 AutoSignature

An e-mail signature consists of text and/or pictures that are automatically added to the end of an outgoing e-mail message. You can create custom signatures for different types of audiences. For example, use your first name for messages to friends and family, or your full name and e-mail address for messages to business contacts. You can also use a signature to add "boilerplate" text, such as an explanation of how you want others to respond to your messages.

Create a signature for messages

Mouse

- From the main Outlook window, on the Tools menu, click Options, and then click the **Mail Format** tab.
- In the Compose in this message format list, click the message form at that you want to use the signature with.

- Under Signature, click **Signatures**, and then click New.
- In the Enter a name for your new signature box, enter a name.

- Under Choose how to create your signature, select the option you want and click Next.
- In the Signature text box, type the text you want to include in the signature. You can also paste text to this box from another document.

Real work
International opportunities
Three work placements

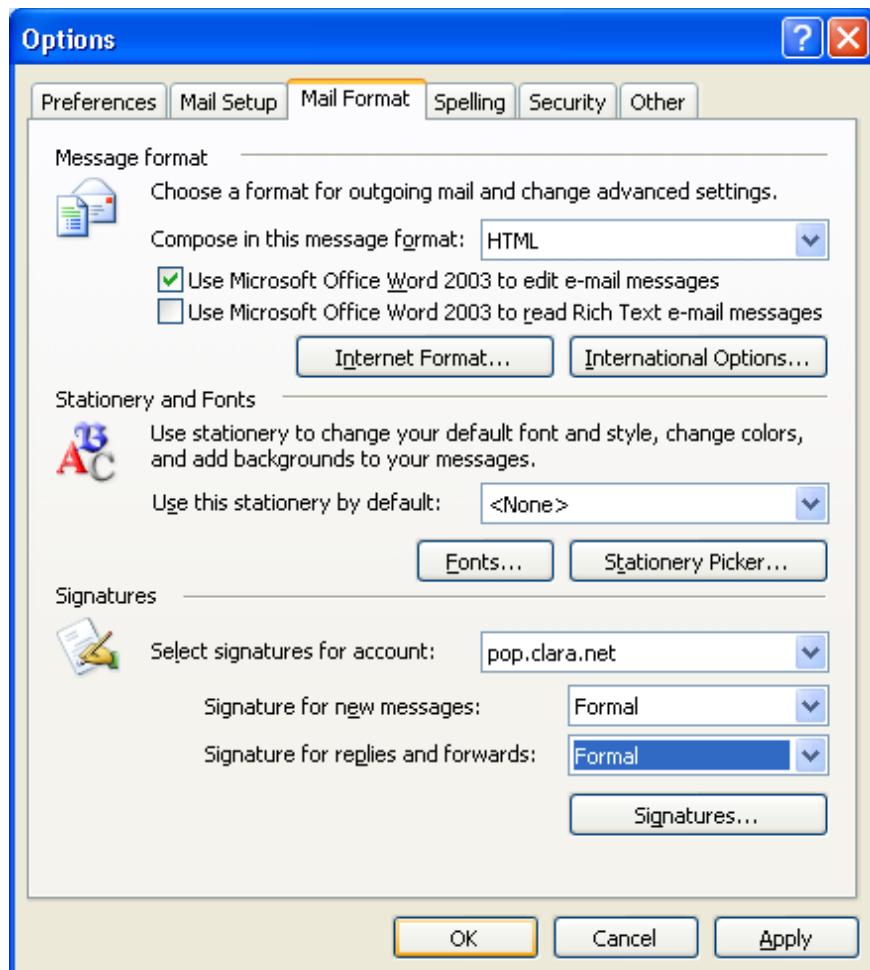

MAERSK

- To change the paragraph or font format, select the text, click Font or Paragraph, and then select the options you want. These options are not available if you use plain text as your message format.
- To add an electronic business card - vCard - to the signature, under vCard options, select a vCard from the list, or click New vCard from Contact.
- Once you've created the signature, you can insert it in all new messages, in all messages you reply to or forward, or just in a specific message.

Automatically insert a signature in all messages

Mouse

- From the main Microsoft Outlook window, on the Tools menu, click Options, and then click the Mail Format tab.
- In the Compose in this message format list, click the message format that you want to use the signature with.

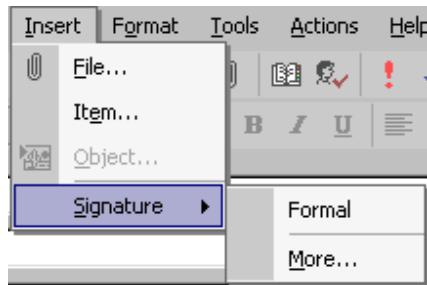

- Under Signature, choose the signatures that you want to use for new messages and for replies and forwards.

Manually insert a signature in an individual message

Mouse

- Create or open the message.
- In the message body, click where you want to insert the signature.

- On the Insert menu, point to Signature, and then click the signature you want. If the signature you want is not listed, click More, and in the Signature box, select the one you want to use.

If you are using Word as your email editor, the above option doesn't appear on the Insert menu. You can however switch between signatures by right-clicking on an existing signature.

3.11 Message Icons

Each message in the View Pane contains a *Message Icon*, the name of the sender, the message subject and the date and time the message was received. The icon next to each message communicates information about the received message:

Message Icons	Description
!	High importance message
↓	Low importance message
✉	Unread message
✉	Read message
⊕✉	Notification of a delivered message
⊖✉	Notification of a read message
⊗✉	Notification that a message was not delivered
⊗✉	Notification that a message was not read
✉	Message with an attachment

Notes

4 Organising your mail

Objectives:

By the end of this section you will be able to:

- **Delete Messages**
- **Create folders**
- **Move and copy messages**
- **Sort items**
- **Find items**
- **Filter messages**
- **Clean up mailbox**
- **Use Out of Office**
- **Recall a message**
- **Print messages**

ENGINEERING, RESEARCH AND OPERATIONS

85 years of innovation

>120,000 employees
>140 nationalities
~85 countries of operation

Who are we?
We are the world's largest oilfield services company. Working globally—often in remote and challenging locations—we invent, design, engineer, and apply technology to help our customers find and produce oil and gas safely.

Who are we looking for?
We're looking for high-energy, self-motivated graduates with vision to work in our engineering, research and operations domain.

What will you be?

Schlumberger

4.1 Organising Mail Messages

As you use Outlook and your e-mail account(s), you will need to delete, store messages in different related folders, sort and find messages.

4.2 Deleting Messages

Once a message is no longer needed, the user can delete it. When a message is deleted, it is stored in the Deleted Items folder. Deleted messages can be retrieved from the Deleted Items folder.

To Delete a Message:

Mouse

-  Select the message to delete.
- Click
Or
- Click and drag the selected message to the Deleted Items folder.

Menu

- Select the message to delete.
- Choose Edit, Delete.
Or
- Click the right mouse button on the selected message, choose Delete. The deleted message is placed in the Deleted Items folder.

Keyboard

- Select the message to delete and press [DELETE]. The deleted message is placed in the Deleted Items folder.

To Retrieve a Deleted Message:

Mouse

- In the Deleted Items folder, click and drag the message to be retrieved into the required folder, e.g. Inbox.
- Release the mouse. The chosen message is now restored to the folder specified.

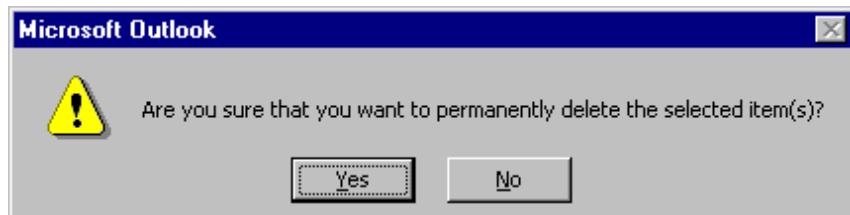

Deleting messages permanently

If messages are no longer required, they MUST be deleted from the deleted Items folder. If this is not done regularly and error message will appear warning you that you have run out of space in your mail box.

To delete a message from the deleted folder:

Mouse

- Open the Deleted Items folder.
- Select the items you want to delete (use the [SHIFT] key to block select or the [CTRL] key to select non-adjacent items).

- Press [DELETE] on the keyboard. Outlook displays the following dialog box:-
- Click Yes to delete the selected items.

If you want to delete everything from the Deleted Items folder, click the right mouse button over the folder icon and choose Empty Deleted Items folder from the resulting shortcut menu.

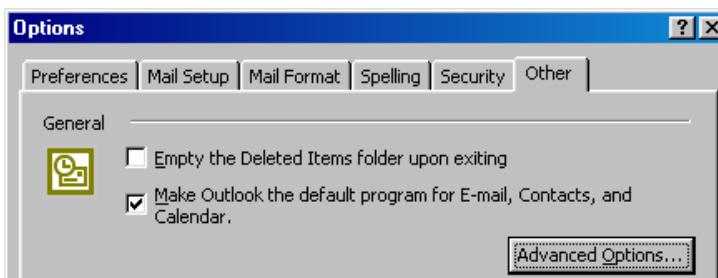

Automatically empty the Deleted Items folder.

You can get Outlook to empty the deleted Items folder upon exiting Outlook.

To empty the Deleted Items folder upon exiting

Mouse

- On the Tools menu, click Options, and then click the Other tab.

- Select the Empty the Deleted Items folder upon exiting check box.

To turn off automatic emptying of the Deleted Items folder, clear the Empty the Deleted Items folder upon exiting check box.

4.3 Working with Folders

The ability to place all types of items in a folder enables the user to store related items in a common location, e.g. spreadsheets, documents and mail messages.

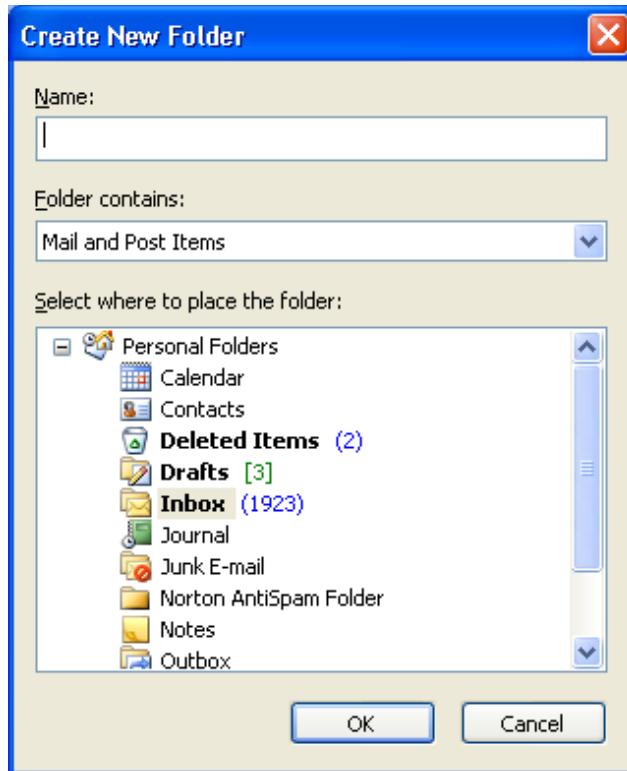

Creating Folders

Users have the ability to create their own Personal folders for organising and storing information. Subfolders can also be created for additional levels of organisation. Subfolders can be copied and moved within the tree structure. Personal folders cannot be moved within the tree structure.

 **To Create a New Folder:**

Menu

- Choose File, New, Folder or Choose File, Folder, New Folder.

- In the **Name** box, type the name for the new folder.
- In the **Folder contains** box, select the type of items the folder is to contain, e.g. Mail Items.
- In the **Select where to place the Folder** box, choose the location for the folder, e.g. Inbox and click OK.

Mouse

- Click the right mouse button on the Folder list, choose New Folder Click the arrow to the right of 
- Choose Folder.

Renaming a folder

 **To Rename a Folder:**

Menu

- Select the folder to rename.
- Choose File, Folder, Rename <>Folder name>>

Or

- Click the right mouse button on the folder to rename, choose Rename <<Folder name>>.
- Type new folder name and press [ENTER].

Expanding and Collapsing a folder

If the user has lots of subfolders, the Folders list can become long and lots of scrolling may be needed to find a particular folder. The user can collapse and expand the Folders list and view just the folders required. Expandable folders are indicated by a + symbol displayed next to them. Collapsible folders have a - symbol displayed next to them.

To Expand a Folder:

Mouse

- Click  on the folder to expand

Or

- Double-click on the folder to expand.

To Collapse a Folder:

Mouse

- Click  on the folder to collapse

**STUDY AT
LINKÖPING UNIVERSITY, SWEDEN**
RANKED AMONG TOP 50 UNIVERSITIES UNDER 50

Interested in Engineering and its various branches? Kick-start your career with a master's degree from Linköping University, Sweden.

Click here!

 **Linköping University**

Or

- Double-click on the folder to collapse.

Moving and Copying Folders

Subfolders can be moved or copied within the tree structure. They can be moved or copied from one Personal folder to another Personal folder. Personal folders cannot be moved within the tree structure.

To Move a Folder:

Menu

- In the Folder list, select the folder to move.
- Choose File, Folder, Move <<Folder name>>

Or

- Choose Edit, Move to Folder

Or

- Click the right mouse button on the folder to move, choose Move <<Folder name>>.
- In the **Move the selected folder to the folder** box, choose the new location for the folder, e.g. Inbox.
- Choose OK. The folder moves to become a subfolder of the folder selected in step.

Mouse

- Click and drag the folder required to the new location in the Folder list, e.g. Inbox.

To Copy a Folder:

Menu

- Select the folder to copy.
- Choose File, Folder, Copy <<Folder name>>

Or

- Choose Edit, Copy to Folder

Or

- Click the right mouse button on the folder to move, choose Copy <<Folder name>>.
- In the **Copy the selected folder to the folder** box, choose the location where the folder is to copy to, e.g. Inbox.
- Choose OK.

Mouse

- Press [CTRL] + click and drag the folder required to the new location, e.g. Inbox.

Deleting Folders

Folders and subfolders can be deleted from the Folder list. When deleting a subfolder, the contents of the folder are also deleted. Subfolders can be retrieved from the Deleted Items folder.

To Delete a folder:

Menu

- Select the folder to delete.
- Choose File, Folder, Delete <<Folder name>>

Or

- Click the right mouse button on the folder to be deleted, choose Delete <<folder name>>.

Mouse

- Select the folder to delete.
- Click .

Deleted folders can be retrieved simply by clicking and dragging the folder required from Deleted Items folder to another folder.

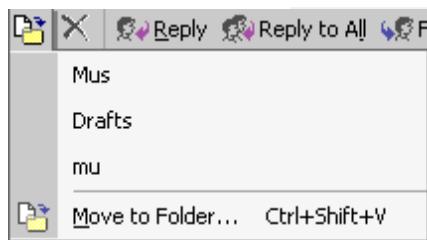

4.4 Moving Messages

Once the folders are set-up, then the users are able to store related items in folders, e.g. spreadsheets, documents and mail messages.

Move an item to another folder:

Toolbar

- Select the item(s) you want to move.
- To select adjacent items, click the first item, and then hold down [SHIFT] and click the last item.
- To select nonadjacent items, click the first item, and then hold down [CTRL] and click additional items.

- To select all items, click the Edit menu, and then click Select All or press [CTRL][A] on the keyboard.
- Click Move to Folder , and then click the name of the folder.
- If the folder isn't listed, click Move to Folder, and then click the folder.
- Select the folder you want to move the item to and click OK.

Mouse

- Select the item(s) you want to move.
- Click and drag the item(s) over the folder you want to move the item(s) to and release the mouse.

**STUDY FOR YOUR MASTER'S DEGREE
IN THE CRADLE OF SWEDISH ENGINEERING**

CHALMERS
UNIVERSITY OF TECHNOLOGY

Copying an Item

To copy an item:

Menu

- Select one or more items.
- On the Edit menu, click Copy.
- Select the folder that you want to paste the item into.
- On the Edit menu, click Paste.

Mouse

- Select the item(s) you want to copy.
- Click and drag the item(s) while holding down the [CTRL] key on the keyboard over the folder you want to copy the item(s) to and release the mouse.

4.5 Public Folders

Public folders are an easy and effective way to collect, organise, and share information with others on your team or across your organisation. You can use public folders to store any type of file or Outlook item.

Use public folders to:

- Post information on an electronic bulletin board. People who use the bulletin board can participate in online discussions. For example, a workgroup can review and provide feedback on new product ideas.
- Share Outlook items in a schedule, contact list, or task list. People can review information that is constantly updated. For example, you might use a company calendar folder to publicise company meetings and holidays, a group contacts folder to make information about the people who work on a project available to everyone, and a team tasks folder to help everyone keep track of work on a project.
- Share files. People have fast access to files created in other programs, such as Microsoft Excel or Word. For example, you might use an employee information folder to find information about company policies or a product reference folder to get product information out to everyone who needs it.

Public folders are created and designed by administrators and others in your workgroup or organisation who have the appropriate permission. If you have permission, you can set up your own public folders and give other people permission to use them. If you want to be innovative, you can apply your own custom views, forms, custom fields, and rules to your public folders.

Creating a public folder

To create a public folder, you must have permission to create folders in an existing public folder. For information about how to obtain permission, see your administrator.

To create a public folder:

Menu

- On the File menu, point to New, and then click Folder.
- In the Name box, enter a name for the folder.
- In the Folder Contains box, click the type of folder you want to create. E.g. Mail and Post Items.
- In the Select where to place the folder list, click the location for the folder under the Public Folders and click OK.

You can copy a private folder to a public folder to quickly start a public folder with existing items.

Setting permission levels

You must have Owner permission: With Owner permission you can create, read, modify, and delete all items and files and create subfolders. As folder owner, you can change the permission level that others have for the folder. This permission does not apply to delegates.) permission for a public folder to set sharing permissions for the folder. You can set permissions for only one folder at a time.

To set permission levels:

Mouse

- In the Folder List, right-click the public folder you want to share, and then click Properties on the shortcut menu.
- Click the Permissions tab.
- Click Add.
- In the Type name or select from list box, enter the name of the person you want to grant sharing permissions to.
- Click Add, and then click OK.
- In the Name box, click the name of the person you just added.
- Under Permissions, choose the settings you want and click OK.

You can assign everyone who has access to the folder the same permissions by clicking Default in the Name box.

Finding Public Folders

You will find all public folders in Outlook positioned under your own private mailbox area.

To open a public folder:

Mouse

- In the Folder List, click Public Folders, and then click the folder you want to open.
- If the folder you want to open is located within another folder, click the plus sign (+) next to each subfolder until you find the folder you want.

Add a public folder shortcut to Favorites

Mouse

- In the Folder List, right-click the public folder for which you want to add a shortcut, and then click Add to Favorites on the shortcut menu.
- To change the name of the public folder that appears in your Favorites folder, type a new name in the Favorite folder name box.
- To add shortcuts to subfolders of this public folder, click Options, and then select the options you want.
- Click Add.

Search for a public folder

Menu

- On the Tools menu, click Find Public Folder.
- To specify which set of public folders to search, click Browse.
- In the Contains text box, enter the text you want to use to search for the folder.
- In the In list, click the search criteria that you want the entry in the Contains text box to apply to.
- If you want to search by date, select the Folders created since check box and then select a date.

Post information in a public folder:

Mouse

- Open the public folder you want to post information in.
- To use the default form for posting information, on the File menu, point to New, and then click Post in This Folder.
- In the form, enter the information you want to post.

Click on the ad to read more

- Click Post.

Reply to information posted in a public folder:

Mouse

- Open the public folder that contains posted information you want to reply to.
- Open the item or file you want to post a reply to.
- To use the default form to reply to posted information, on the Actions menu, click Post Reply to Folder.
- In the form, enter the information you want to post. Click Post Reply.

Reply to the person who posted information in a public folder:

Mouse

- In the Folder List, click Public Folders, and then click the folder you want to open.
- If the folder you want to open is located within another folder, click the plus sign (+) next to each subfolder until you find the folder you want.
- Select the item or file you want to reply to.
- Click  **Reply**.
- Type your reply and click Send.

4.6 Sorting items

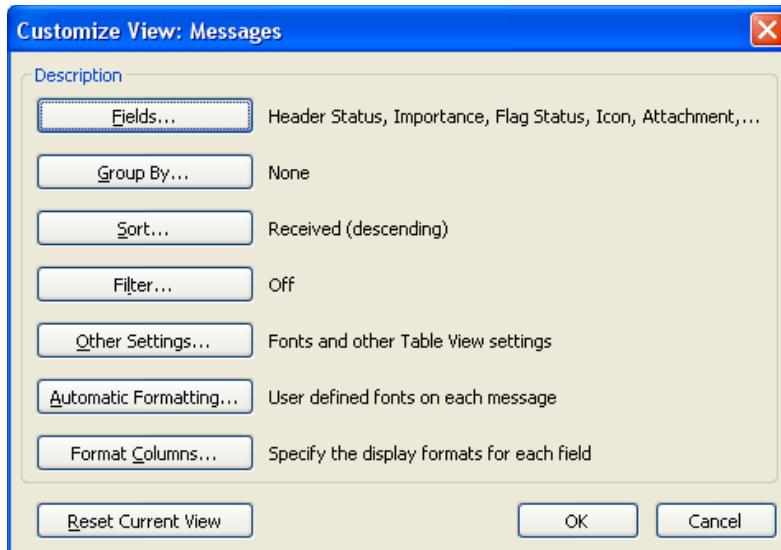

Sorting is a way of arranging items in ascending or descending order. You can sort items in any view, based on one field or multiple fields, with the exception of the time-based views such as Day/Week/Month and timeline. For example, you can sort a list of e-mail messages alphabetically by sender and then by subject. (The abbreviations RE and FW in the Subject box are ignored when you sort messages alphabetically by subject).

By default, the most recently received messages are placed at the top of the View Pane. Messages can be sorted by importance, icon, flag status, attachment, sender, or subject in Ascending or Descending order.

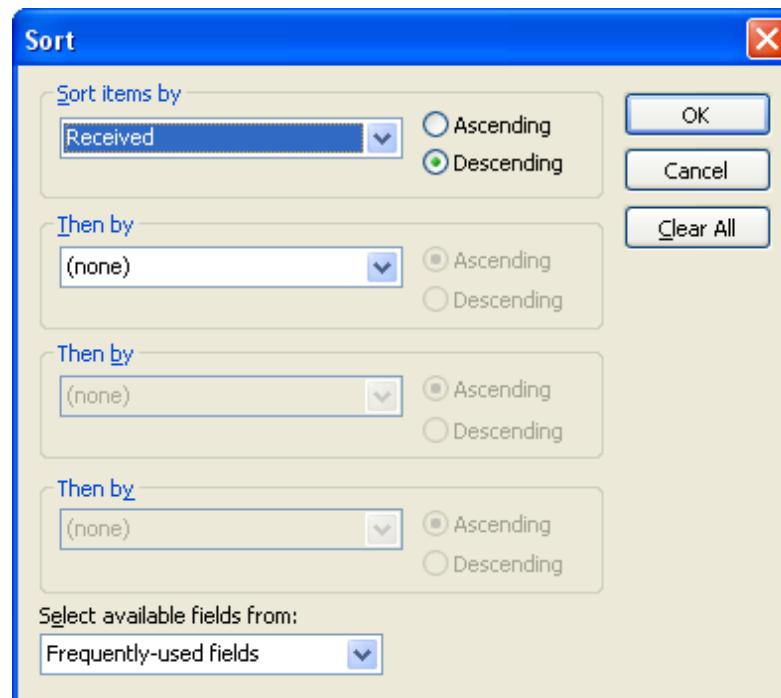

To sort a list of messages, contacts, notes, or files:

Mouse

- Select a folder whose items you would like to sort.
- On the View menu, point to Arrange By, Current View, and then click Customize Current View.

- Click Sort.

- In the Sort items by box, click a field to sort by. If the field you want isn't in the Sort items by box, click a different field set in the Select available fields from box.

If the field you sort by is the same as the field items are grouped by, Microsoft Outlook sorts the group headings instead of the items within each group. To sort the individual items in a group, click a field in the Sort items by box that is different from the Group by field you have chosen.

- Click Ascending or Descending for the sort order.
- To sort by an additional field, click a field in the Then by box and click OK.

Or

- If you are in a table view type, you can click a column heading to sort by that column.
- A triangle will appear on the column header indicating the sort order, e.g. a downward facing triangle indicates a descending sort order.

4.7 Finding Items

As your Inbox grows in length with received messages there will come a time when you want to find a particular item but you do not know which message it was in. Outlook provides a Find feature for such occasions.

To find a message:

Mouse

WHERE DO YOU WANT TO BE?

TomTom is a place for people who see solutions when faced with problems, who have the energy to drive our technology, innovation, growth along with goal achievement. We make it easy for people to make smarter decisions to keep moving towards their goals. If you share our passion - this could be the place for you.

Founded in 1991 and headquartered in Amsterdam, we have 3,600 employees worldwide and sell our products in over 35 countries.

For further information, please visit tomtom.jobs

- From the Standard toolbar, click the Find button . The following find bar opens up above the message headers.
- In the Look for box, type any text you want to search for in the most common fields of the item, or click the arrow on the Look for box to use previous search text.
- Specify the folders you want to search. If you have more than one account, Microsoft Outlook searches the folders in the current account only.
- Click Find Now, the search takes place and the results are displayed.

 **To stop the search:**

Mouse

- On the Find Bar, click Stop.
- To restart the search, click Find Now.

 **Clear the search results and display all the items in the current view:**

Mouse

- Click Clear Results on the Find bar.

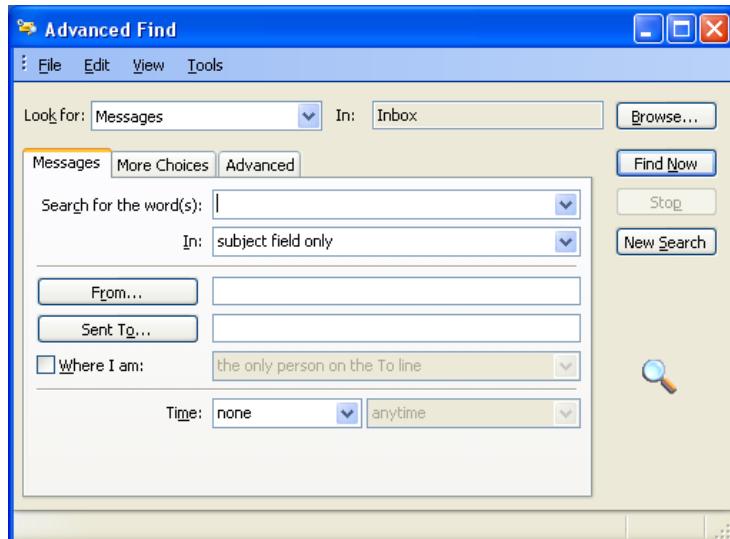

Advanced Find

You can also search for items or files using more complex criteria by using the advanced find.

 **To perform an advanced find:**

Mouse

- On the Tools menu, click Find, Advanced Find

Or

- From the Standard toolbar, click the Find button  and click Options ▾ and Advanced Find.
- In the Look for box, click the type of item or file you want to search for.
- If the folder you want to search does not appear in the In box, or you want to search more than one folder, click Browse to select from a list.
- Type any text you want to search for in the most common fields of the item, or click the arrow on the Look for box to use previous search text.
- Select the remaining search options you want, and then click Find Now.

4.8 Filtering Items

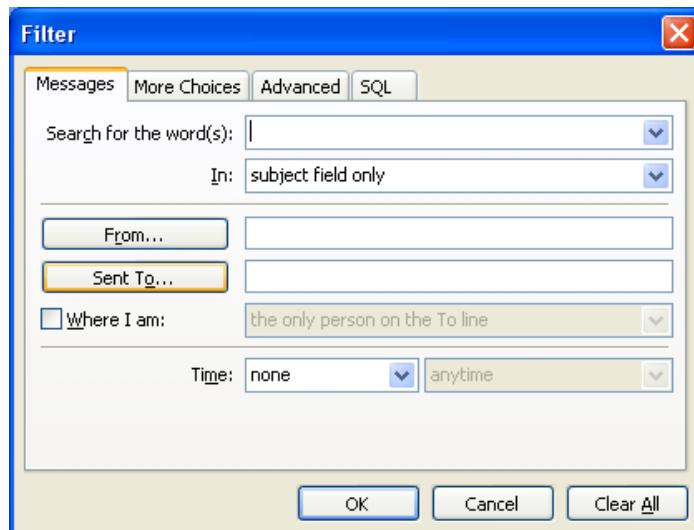

A filter is an easy way to view only those items or files that meet conditions you specify. For example, you can filter all items with “Jane Brown” in the From box to see only items from Jane Brown. All of the other items are still in the folder and can be seen again by removing the filter.

When a filter is applied to a selected folder, the status bar displays the words “Filter Applied” in the lower-left corner of the screen.

To show or hide items or files with a filter:

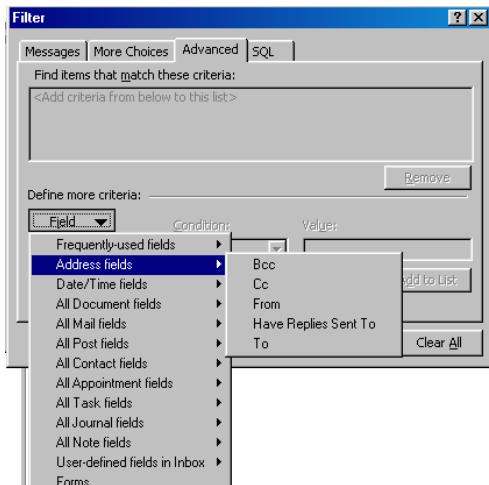

Mouse

- Click the folder you want to apply a filter to.
- On the View menu, point to Arrange By, Current View, and then click Customize Current View.
- Click the Filter button

- Select the filter options you want.
- To filter using additional criteria such as a category or importance level, click the More Choices tab, and then select the options you want.

- If you select more than one option, only the items that meet all of the criteria appear. However, if you use the same field to set multiple criteria, items that meet one criterion within that field are found.
- You can customise your criteria by using the Advanced tab.
- Click Field.
- Point to the field set you want, and then click the field you want to use in the search criteria.
- In the Condition box, click the condition you want to use with the selected field. The conditions available depend on the field selected.

.....Alcatel-Lucent 

www.alcatel-lucent.com/careers

**What if
you could
build your
future and
create the
future?**

One generation's transformation is the next's status quo.
In the near future, people may soon think it's strange that
devices ever had to be "plugged in." To obtain that status, there
needs to be "The Shift".

- If the condition requires a value, enter the value you want the field and condition to meet in the Value box.
- Click **OK**.

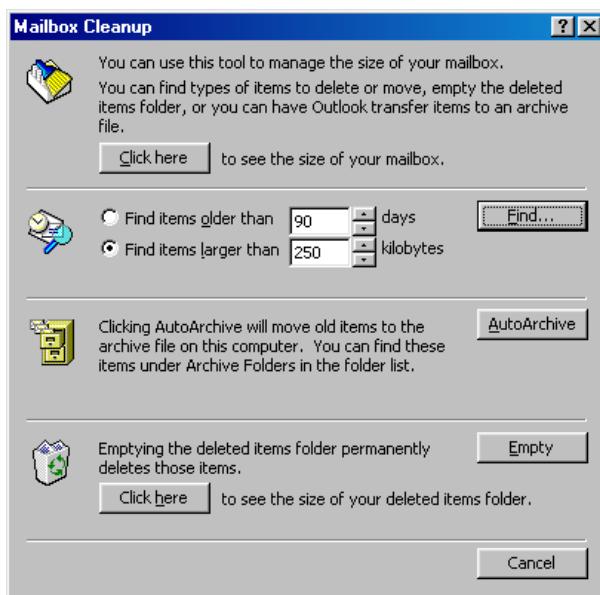

4.9 Mailbox Cleanup

With Mailbox Cleanup feature, you can manage the size of your mailbox to improve the overall performance of Microsoft Outlook.

To use Mailbox Cleanup:

Menu

- On the Tools menu, click Mailbox Cleanup.

- Click **Click here** to view the total size of your mailbox and of individual folders within it.
- Find items that are larger than a certain KB size or older than a certain date.
- Archive items using **AutoArchive**.
- View the size and **Empty** your Deleted Items folder.

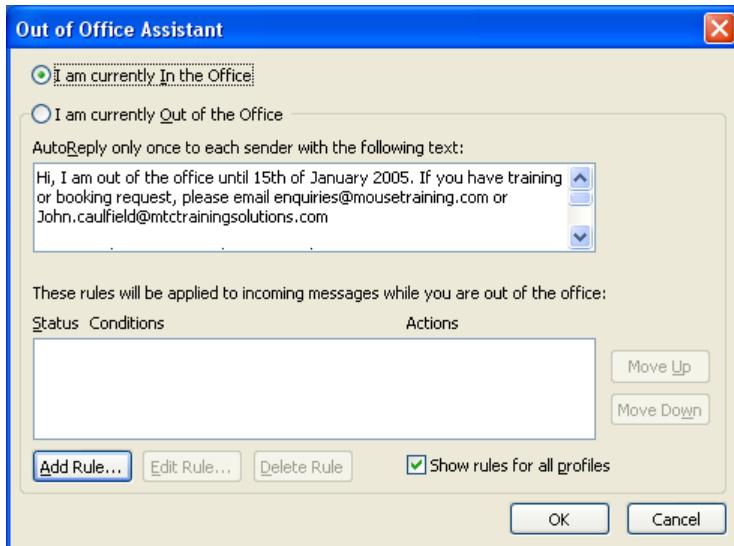

4.10 Out of Office

If you're not going to check e-mail while you're out of the office, use the Out of Office Assistant to manage your Inbox. You can automatically respond to incoming mail. You can also create rules that automatically manage incoming messages by telling Microsoft Outlook what action to take with them. For example, you can create rules to automatically move or copy messages to other folders, to delete messages, to send custom replies, and so on.

To automatically reply to incoming messages while out of the office:

Menu

- On the Tools menu, click Out of Office Assistant.

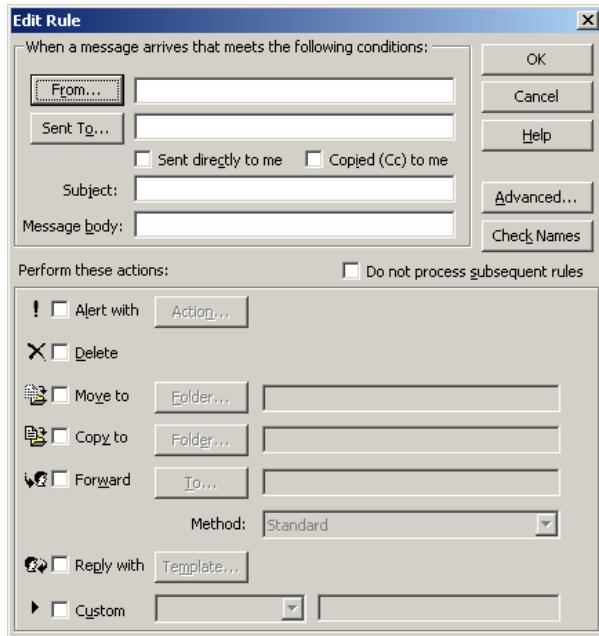

- Click I am currently Out of the Office.
- In the AutoReply only once to each sender with the following text box, type the message you want to send to others while you are out.

 **To create rules to manage your mail while out of the office:**

Menu

- On the Tools menu, click Out of Office Assistant.
- Click **Add Rule**.
- Under When a message arrives that meets the following conditions, specify the conditions of the rule that the message must meet for the action to occur.

- To specify more conditions, click Advanced, select the options you want, and then click **OK**.
- To specify that this rule must be the last one applied, select the Do not process subsequent rules check box.
- Under Perform these actions, select the options you want. You can select more than one option.

**REDEFINE
YOUR FUTURE**

**> Join AXA,
A GLOBAL LEADING
COMPANY IN INSURANCE
AND ASSET MANAGEMENT**

redefining / standards 

agence cdg - © Photononstop

To turn an Out of Office Assistant rule on or off:**Menu**

- Click Out of Office Assistant on the Tools menu.
- In the Status box, select or clear the check box next to the rule you want to turn on or off.

To edit the Out of Office Assistant rules:**Menu**

- Click Out of Office Assistant on the Tools menu.
- Click Edit Rule to change a specific rule. Make changes to the conditions and actions for the rule.
- Click the rule you want to move up or down in the list and click Move Up or Move Down to change the order in which rules are applied for Out of Office Assistant.
- Click **Delete Rule** to delete the rule you want to delete.

4.11 Marking Messages as Read and Unread

Unread messages are displayed with bold text headers giving the user a visual identification of which messages still need to be read. The user may decide from viewing the subject title, not to read the message or group of messages. An unread message can be marked as read to remove the bold text from the message header. A message that has been read and contains important or reference materials can be marked as unread allowing the user to see the message location at a glance.

To Mark a Message as Read:**Menu**

- Select the required message.
- Choose Edit, Mark as Read

Or

- Click the right mouse button on the selected message, choose Mark as Read.
- Bold formatting is removed from the message header.

To Mark a Message as Unread:**Menu**

- Select the required message.
- Choose Edit, Mark as Unread

Or

- Click the right mouse button on the selected message, choose Mark as Unread.
- Bold formatting appears on the message header.

4.12 Printing Messages

A range of messages can be printed by clicking on the first message required, pressing [SHIFT] and clicking on the last message required. Several individual messages can also be selected by pressing [CTRL] whilst clicking on the messages required.

To Print a Message:

Menu

- Open the required message

Or

- Select the message required from the View Pane.
- Choose File, Print. The Print dialog box displays.
- Choose OK.

Mouse

- Select the message to print.
-  Click
- The selected messages are automatically printed.

4.13 Recalling Sent Messages

The user may want to recall a message that is inaccurate or inappropriate. A message can only be recalled if it has not been read by the recipients or has not been moved out of the recipients' Inboxes.

To Recall a Message:

Menu

- In the Sent Items folder, open the message to recall.
- Choose Actions, Recall this Message.

To receive notification about the success of the recall or replacement for each recipient, select this check box

- The Recall This Message dialog box displays.
- To remove the sent message from the Inboxes of all the recipients who have not opened the message, choose Delete unread copies of this message and choose OK

Or

- To remove the sent message from the Inboxes of all the recipients, and then open a new message that the user can send to replace the original, choose Delete unread copies and replace with a new message, choose OK, type and send the new message.

To replace a message, a new message must be sent. If a new message is not sent, the original message is still recalled.

4.14 Changing Column Headings

Column headings can be added, moved, removed or new column headings created in the View Pane. The width of the column heading can also be sized to meet the user's requirements.

To Add an Existing Column Heading:

Menu

- Choose View, Arrange By, Current View, Customize Current View, then select Fields. The Show Fields dialog box displays.
- In the **Available fields** box, select the required field.
- Choose Add and click **OK**.

To Create a New Column Heading:

Menu

- Repeat Step 1 above.
- Choose New Field. Type the required field name.
- Choose the field type and format required. Choose **OK**.
- The name of the new field displays in the **Show these fields in this order** box. Choose **OK**.

To Move a Column Heading:

Menu

- Choose View, Arrange By, Current View, Customize Current View, Fields.
- In the **Show these fields in this order** box, select the field to move.
- Choose Move Up to move the selected field up the listing

Or

- Choose Move Down to move the selected field down the listing.
- Choose **OK**.

 **To Remove a Column Heading:**

Menu

- Choose View, Arrange By, Current View, Customize Views, select Fields.
- In the **Show these fields In this order** box, select the field to be removed.
- Choose Remove.
- Choose OK. The selected column heading is removed.

 **To Size a Column Heading:**

Mouse

- Position the mouse pointer on the right edge of the required column headings.
- The mouse pointer changes to a double-headed arrow.
- Click and drag the column heading to the left to reduce the column or.
- Click and drag the column heading to the right to enlarge the column.
